The Good News: EU Aid works.

EU aid has had an amazing impact in the fight against poverty. The next 7-year budget is set to achieve:

- + 9 MILLION children vaccinated
- + 15 MILLION children in school
- + 51 MILLION people with clean water

The Bad News: Budget cuts could be devastating to the world’s poorest.

Europe’s leaders are in the midst of crucial budget negotiations and European Council President Van Rompuy has proposed disproportionate cuts to lifesaving programs. If these cuts go ahead it could mean...

- 1.9 MILLION less pupils in primary school
- 1.2 MILLION less children vaccinated against measles
- 840,000 fewer births attended by health personnel
- 1.6 MILLION less people with insecticide-treated nets
- 1.9 MILLION less people connected to sanitation facilities
- 6.5 MILLION less people with clean drinking water

Don’t let this happen. ONE.ORG/LIFESAVER

ONE is a global campaigning organisation that fights for smart programs and policies that give the poorest people on the planet a real chance to break out of the cycle of extreme poverty.

Made up of three million members around the world, we campaign together by writing letters, signing petitions, making phone calls and meeting with our representatives on the local, national and international level.

When acting alone, it’s hard to make a difference. But when we act together, we can create real change. That’s how advocacy works, and it’s what we do at ONE.
