General Laboratory Applications

Choose the right filter for your application specific needs;

Our high-performance and low cost portfolio of syringe filters offers a broad range of filtration materials with different diameters and pore sizes. A consistency in quality, accuracy and performance for today's scientists for their daily filtration needs.

- > Available from both Hydrophilic and Hydrophobic materials
- > Wide range of filtration application
- > Chemical resistant Polypropylene housing
- > Batch specific Certificate of Analysis available
- > 13mm., 25mm., and 33mm. membrane diameter
- > Choose from; 0,22µm and 0,45µm pore sizes
- > Color coded housing for easy identification
- > Female luer lock/Male luer slip
- > Wide filtration area 3,4cm² for 25mm filters
- > Membrane material and four size written on the housing
- > Low hold-up volume

***Do not forget to ask
your free sample!***

Membrane Information:

PTFE

Polytetrafluoroethylene membrane that is originally Hydrophobic. However, we designed this specific membrane to fulfill your Hydrophilic filtrations needs as-well. High chemical resistance against aggressive solvents and strong acids. Wide chemical compatibility and filtration spectrum.

PVDF

Polyvinylidene Difluoride, a hydrophilic membrane suitable for aqueous solutions. High chemical resistance against organic solvents.

NYLON

Nylon membrane is used mainly for organic solutions and high pH samples. Limited usage against protein recovery applications.
