WHAT WE KNOW

When the workforce begins returning there will be many changes and there is no time to waste in getting solutions to accommodate this new era.

- Social distancing will be enforced/encouraged/expected (studies show well into 2022).
- High-density offices will phase out, as the demand increases for personal space.
- Higher demand for non-porous materials in high-touch areas, that can be cleaned/sanitized numerous times a day (glass/metal/laminate).
- Conference tables and collaboration areas accommodating less people.
- Open plans/concepts will need to have additional screens and dividers to ensure space.
- Working from home will increase as less and less people are required to be “in-office” enabling more room to accommodate the workers needing to be in office regularly.
- Hoteling, “hot desks”, co-working spaces and/or temporary seating will lose popularity as the fear of contagions holds increased relevancy.

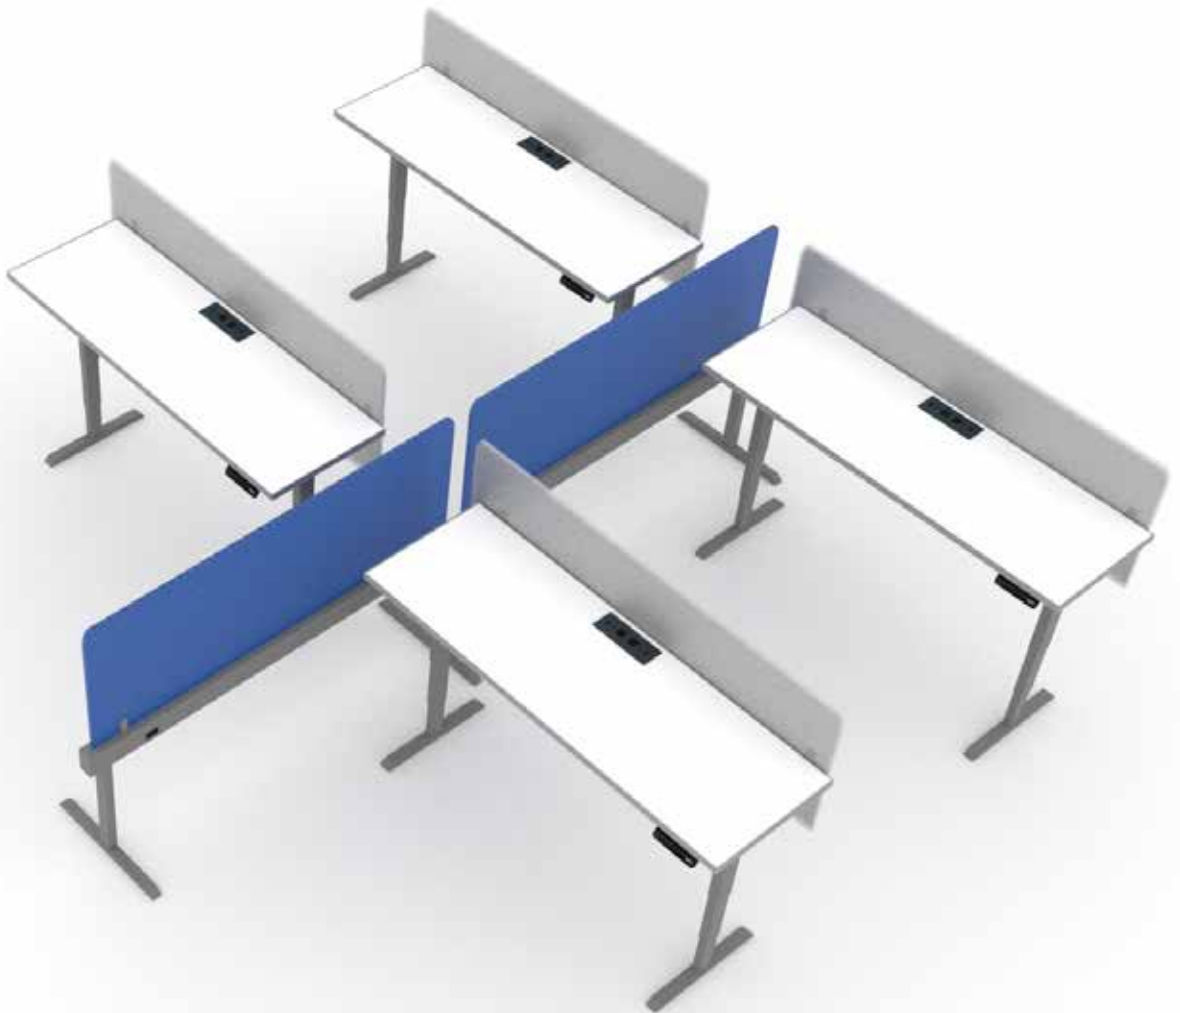

Benching | Open Plan Solutions

The addition of privacy screens is the simplest solution for increasing privacy and space division in benching and open plan configurations.

Privacy screens and dividers are available in tempered glass, frosted glass, plexiglass, laminate, and fabric.

Note: Painted glass is a great way to incorporate color without sacrificing cleanability.

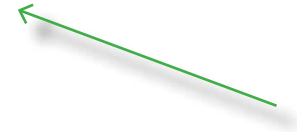

gen2 Zone Divider – Floor mounted

Zone dividers can add privacy, create space division, and separate different areas into unique zones.

gen2 Zone Divider – Freestanding

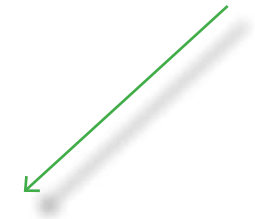

Very easy to move and rearrange.

Available with or without casters.

Workstation | Workplace Solutions

- Shrinking panel heights is now a thing of the past.
- gen2 offers many panel sizes up to 80" high so workstations do not have to compromise on personal space or privacy.
- Fabric can be difficult to clean/disinfect, but laminate, glass, and metal are great ways to add a unique look to your panel based workstations and they are easy to clean!

Are your panels too low? Do you wish they were higher so they would provide more privacy and increased separation? gen2 Panel Stackers are the perfect solution.

Available in framed and frameless versions.

Available with tempered glass, frosted glass, plexiglass, and fabric

Compatible with most office furniture systems.

gen2 Wall is an affordable demountable wall system to create private rooms.

Available in fabric, laminate, glass, and metal.

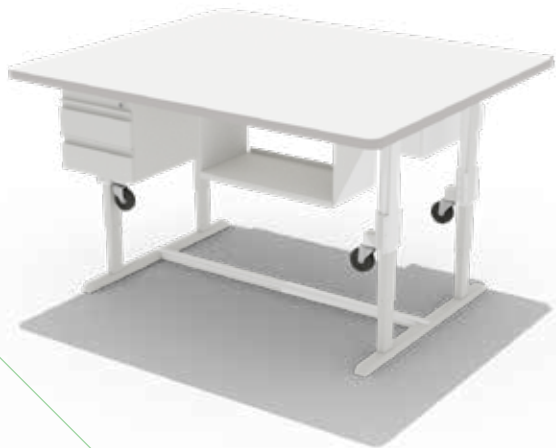

Much easier to specify, order, and install than most floor-to-ceiling wall systems.

gen2 Workbenches can help give the manufacturing and material handling industries the flexibility they need to follow social distancing protocols.

Tops available in laminate, solid wood butcher block, and stainless steel.

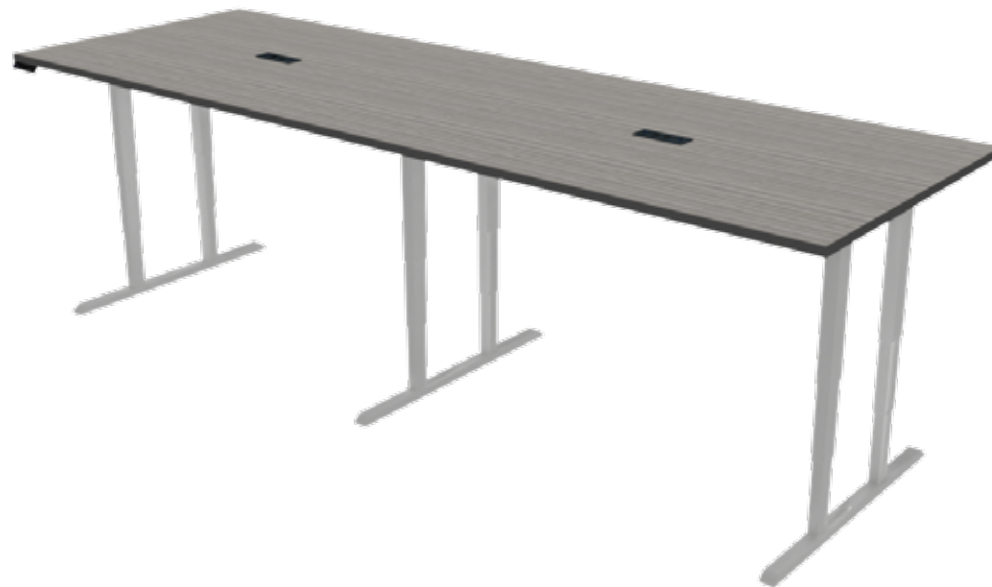

gen2 Workbenches can be completely customized.

Conference and Collaboration Solutions

The ability to have virtual meetings is great, but not always the most practical. Conducting a standing height meeting can allow you to meet in person without sacrificing social distancing measures.

gen2 laminate worksurfaces and tables have excellent cleanability. For even more protection, gen2 also offers laminates with antimicrobial technology built into the surface to prevent the growth of mold, mildew, bacteria, and other microbes.

Work-From-Home Solutions

Studies show the work-from-home movement has only just begun, in the wake of the pandemic we will only see more and more people remote working from home.

gen2 offers custom manufactured solutions to meet the unique needs of each workplace.

Contact us to get pricing and lead times, don't forget about our Quick Ship Options.
