The Kellenberg Math Department is pleased to offer a special seminar for seniors who are completing their Statistics and Finance, PreCalculus, or Calculus course.

The Senior Statistics Seminar

Many college programs require the extensive use of mathematical and statistical concepts without needing the study of calculus. This seminar is for students whose college math programs will require advanced algebraic topics, and especially statistical techniques, including data and regression analysis. During the seminar, extensive class time will be devoted to the many statistical features of a graphing calculator.

Key Facts – 2023 Statistics Seminar

- 6 Sessions, Mondays and Wednesdays
  - May 22\textsuperscript{nd}, May 24\textsuperscript{th}, May 31\textsuperscript{st}, June 5\textsuperscript{th}, June 7\textsuperscript{th}, June 12\textsuperscript{th}
- Meeting times: 10:00 AM – 12:00 PM
- Mr. Casalinuovo, Instructor
- Extensive Class Notes provide useful resources for college
- For further information: MrCasalinuovo@Kellenberg.org

You should take this seminar if you are going to be studying:

- Mathematics
- Psychology
- Actuarial Studies
- Statistics
- Business
- Computer Science
- Pre-Med
- Nursing
- Physics
- Accounting
- Data Science
- Data Analysis
- Economics
- Pharmacy
- Data Analysis
