

U.S. GLUTEN FREE PRODUCTS

Gluten is a protein found in rye, barley and wheat, including atta, bulgur, couscous, durum, einkorn, emmer, farina, kamut, seitan, semolina, spelt, and triticale. Campbell also considers oats as gluten containing grains because there is a high chance different grains mix during harvest, storage, transportation, and processing.

Campbell has a strict two-step process for classifying a product as gluten-free. First, we verify all the ingredients are gluten-free, then we analyze the finished product to make sure it is also free from any gluten.

Here is our current list of gluten-free products. We occasionally tweak and improve our recipes so we encourage you to double check the ingredient statement on the label of any product, just to be sure.

Visit www.campbellswithoutgluten.com for the most up to date gluten free list.
