How to Excel in Academic Writing
Academic writing refers to writing that conforms to specific expectations of language, structure, and purpose, such as writing required for graduate class assignments; writing appropriate for dissertations; writing up conference proposals; and, writing for publication in scholarly journals (Richards & Lassonde, 2005). In this one-hour session, Dr. Janet Richards will share the do’s and don’ts pertinent to exemplary academic writing, such as no weak ‘ing’ verbs; how to write in active voice, and judicious use of the word, ‘that’. Dr. Richards will supply a listing of these many recommendations participants can independently use to revise and edit their work.

Lunch will be provided.
