Purpose of this Summit

In the fall, every year, the Osage Minerals Council and Osage County Producers Association host the Osage Oil & Gas Summit in Tulsa, OK. Our mission is to showcase the 1.5 million acre Osage Mineral Estate to existing and prospective investors and offer presentations that are sure to add value to all stakeholders in oil and gas. We strive to support the exploration, development and production of oil, gas & other minerals in Osage Co., OK. With tens of thousands of acres still untested there is ample opportunity to find incremental reserves and make new discoveries. Presentations that educate and present solutions for marginal well production challenges and regulatory hurdles to drilling and operations regarding the unique Osage Mineral Estate are offered. Attendees will have an opportunity to hear technical papers regarding Osage Co. geology, technologies for EOR, and speakers giving practical gas measurement and contract advice. Our opening ceremony is not like any other conference. You will experience the Osage Drum & Singers in their native language with prayer and songs. After taking a look at the Agenda inside this brochure, you will not want to miss this outstanding Speaker lineup that includes top industry executives, professionals and academics presenting on topics that directly affect your bottom line.
