INTRODUCTION

About

In February 2021, building immediately upon the success of the virtual Advanced Practice Provider (APRN & PA) Administration & Leadership Series (previously mini-conferences), APPex developed and expanded additional online conferences. Events in the Clinical Conferences Series are full day sessions that maintain the same scheduling and format as the Administration & Leadership Series, being held on Fridays (and occasionally Saturdays) from 10AM – 6PM ET, and are accessible remotely. Along with an annual in-person conference (summit), APPex offers virtual continuing education in:

- Administration & Leadership
- Hospital Clinical
- Hospital (Pediatric) Clinical
- Specialty Training
- Other Clinical

While the annual conference (summit) and the Administration & Leadership Series focus on administrative and leadership topics in advanced practice for APRNs & PAs, conferences in the clinical series are different. They offer a wide range of clinically-related content that medical providers in a host of medical specialties and sub-specialties would find necessary for foundational training and valuable for ongoing professional development. Each clinical series conference features a partnering/co-hosting academic medical center or hospital, or a professional membership group related to one or more of the advanced practice roles. Its leaders and staff help select topics, choose speakers, and shape the agenda. All presentations are prepared and delivered by advanced practice providers (APRNs & PAs), physicians (MDs/DOs) and other healthcare professionals.

In May 2021, Seattle Children's Hospital became the inaugural organization to kick off conferences in the clinical series.

Benefits to Attendance
