Motor guide xi5-80fw/45

Xi5 Wireless Trolling Motor - Freshwater - Sonar/GPS - 80lbs-45-24V The Xi5 is designed to exceed today's discriminating customer expectations. It is designed to be reliable every day and durable in the long run. Unlike the competition, the Xi5 includes wireless capacity straight from the box, anglers can command the precise engine and steering control from anywhere on the boat. A wireless pedal is standard with freshwater models. In addition, we make it stealthy quiet and soft-skinned. And you'll also see thoughtful details that make it safe and easy to use. Key status indicators of advantages at a glance The Xi5 uses LED lights on the controller so that the anglers can quickly check the status of four key functions in any light condition. The battery power indicator uses different colored lights to show three levels of battery life in real time. Wireless pedal for precise control Our wireless pedal provides excellent motor control from anywhere on the boat. Intuitive, pro-style heel operation of the teeth controls extremely quiet, precise and 50% faster steering than the competition. The digital variable speed control allows for exceptional low-speed trolling capability and longer runtime. State-of-the-art digital technology Our wireless pedal provides excellent motor control from anywhere on the boat. Our new Digital technology features durable energy electronics that run cooler that are 50% more efficient. They also capture and store energy that is typically lost as heat. This improved efficiency means longer runtime and fewer battery loads. Digital speed control provides power, smoothly and incrementally, at the precise level required by the operator. Low profile support An improved low profile mount is all about form and function. The base uses anodized aluminum to prevent corrosion. The hardware components are stainless steel throughout, including the connection that was built to be extra hard. The unique storage and deployment mechanism aligns and guides the engine to the stored position and protects it in place. For added security, a secondary lock prevents unintentional deployment and potential damage. Sophisticated Steering Transmission Features - From its ball bearings that reduce friction and wear, to custom seals that keep water and dust out, to an extra-rigid support tube - the Xi5 steering transmission delivers reliable, quiet and accurate performance. Fully protected electronics - High-efficiency electronics are fully encapsulated in a high-tech coating, making them immune to water and dust. There is also a protection circuit that prevents damage to the lower unit if the Stopped. Composite axis - The composite axis can take on any and all obstructions that get in its way. It's going to double, but it's not going to break. That's why it's backed up with a lifetime warranty. WARNING: This product may expose you to chemicals that are known as the State of cause cancer, birth defects or other reproductive damage. For more information, go to P65Warnings.ca.gov. Product : MOTORGUIDE Xi5-80FW 45 24V FP SNR GPS BOW MOUNT Manufacturer: MotorGuide Manufacturer Part : 940800270 UPC : 022697940803 Product : MOTORGUIDE Xi5-80FW 45 24V FP SNR GPS BOW MOUNT Designed to be reliable every day and durable over the long haul. Unlike the competition, the new Xi5 includes wireless capacity straight from the box, so fishermen can command precise engine and steering control from anywhere on the boat. Led lights on the controller allow you to quickly check the status of four key functions in any light conditions, including On/Ready, On, Identify Active GPS, and Battery Status. The battery power indicator uses different colored lights to show three levels of battery life in real time. Integrated Sonar Models (SNR) Uses built-in lowrance® 83/200kHz Dual Band transducers with pre-installed 7-Pin Lowrance connector. Adapter cables available for other sonar manufacturer monitors, including Garmin® and Humminbird®. GPS models: Pre-installed pinpoint GPS uses an ultra-accurate GPS receiver and precision control algorithms for incredibly accurate performance. Controlled from a compact and easy-to-use remote control. Features include Anchor Hold to save/recall 8 locations, Heading Lock to maintain a compass position, Routes allows you to save/recall 8 routes of up to 4 miles each, and Cruise Control to maintain GPS speed regardless of wind and current conditions. Ultra-quiet operation with precision gears, low friction bearings and tight adjustment components Precision steering with fast rotation speed and improved capability to provide fine adjustments Encapsulated concave, digital electronics improves reliability, increases runtime A better low-profile assembly with storage mechanism and deployment The composite shaft is supported by a life-long guaranteed wireless foot pedal included with the heel-to-foot operation. Variable speed control, momentary and more. 2 years factory warranty Model: Xi5-80FW SNR GPS Volts: 24 Boost: 80 Shaft: 45 Speeds: Variable : KMS Part# MOT 940800270 DMP Part# 28-7402 Supplier # 940800270 Only logged in to customers who purchased this product can leave a review.
