SEATTLE, WASH. – Vigor expanded its growing portfolio of international sales with the delivery of two, 19m all-weather pilot boats to The Port of Duqm Company (PDC), SAOC, Sultanate of Oman. The Port has been undergoing a major multiphase expansion and the new pilot boats will play a key role in ensuring the safety of vessels calling on the port. "This is an important delivery for us," said Keith Whittemore, Vigor Executive Vice President of Business Development. "PDC is a world class, state-of-the-art Port with a major commitment to quality and safety. Our team was honored to be chosen to help PDC achieve the objective of setting the new standard for pilot boats in the Middle East." Built at Vigor's Ballard facility (formerly Kvichak Marine), the vessels not only function as pilot boats but also as search and rescue and oil spill recovery vessels. The all-aluminum vessels are powered by twin Cummins QSK-19 marine diesel engines rated for 800 hp @ 2100 rpm each and twin ZF 2000A transmissions driving NiBrAl 5-bladed fixed propellers providing an operating speed of ~20 knots. Beyond North American sales, over the years Vigor has successfully delivered vessels throughout Asia, Africa, Europe, Australia and South America. The delivery of Duqm pilot boats expands Vigor's Middle East presence and helps further an international strategy in specialized commercial markets and foreign military sales. For more info contact Vigor at (206) 623-1635 x197 or marinesales@vigor.net

The M/V Deacon is an 120' x 43' all aluminum vessel

designed to transport 250 passengers at 30 knots.

The swath design provides dramatically better ride in high seas than a mono-hull or a catamaran vessel.

How does the swath compare to a conventional vessel? Watch our online video.

Possible Uses:

• Crew Boat • Yacht • Dinner Cruises

• Whale Watching • Research Vessel • Casino

• Military • Passenger Ferry • Seismic Vessel

Game Changer

Much has gone into the design and engineering of our new generation of the popular Chesapeake Class pilot boat. We started with the proven C. Raymond Hunt Deep-V hull and incorporated an interceptor trim-control system and steerable pod drives to provide more comfort, increased maneuverability and higher speeds – all while burning 25% less fuel.

HOOP PILE HOLDERS

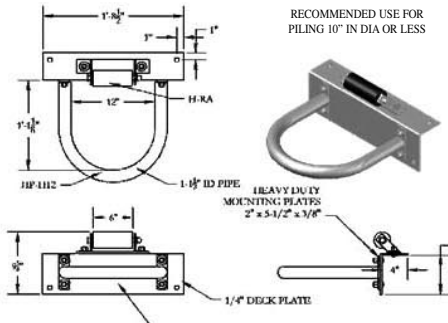

Our convertible Hoop Pile Holders have 3 basic pieces, a dock bracket, a hoop and a roller assembly. This allows you to have a hoop pile holder the way you want it, whether it be a permanent hoop, a removable hoop or a hoop with a roller. All Hoops on this page are 1-1/2" schedule 40 pipe. The dock brackets are 4" x 6" x 1/4" angle. The Roller assembly features a 6" solid poly roller and can be bolted to the deck plate or directly to the dock. All parts are hot dipped galvanized. Add a UHMW Roller to any assembly as shown at the bottom of page 19.

WOOD DOCK HARDWARE

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

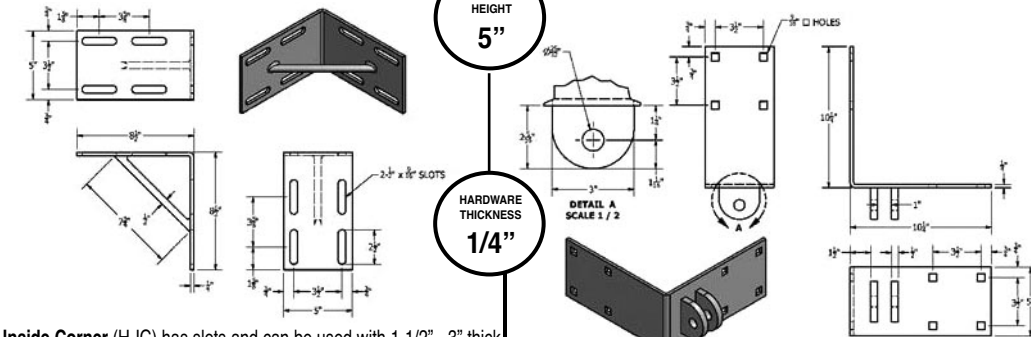

Outside Corner End (H-OCE) is used at the ends of fingers, ends of dock or for swim platforms.

H-OCE Ship#7 \$12.98

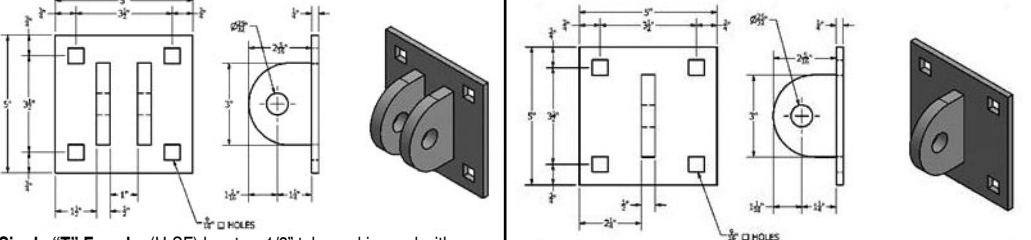

Outside Corner Male (H-OCM) has one 1/2" tab and a hole for a 3/4" bolt or B-PIN. Would be used with an Outside Corner Female (H-OCF) or with a Single "T" Female (H-SF). H-OCM Ship#8 \$18.71

WOOD DOCK HARDWARE

Inside Corner (H-IC) has slots and can be used with 1-1/2" - 3" thick wood. The inside corner sandwiches the wood between the opposite outside corner, keeping bolts from burying themselves in the wood. A corner gusset gives the unit a lot of strength and helps from racking the dock. H-IC Ship#7 \$13.95

Outside Corner Female (H-OCF) has two 1/2" tabs and a hole for a 3/4" bolt or B-PIN. Would be used with an Outside Corner Male (H-OCM) or with a Single "T" Male (H-SM). H-OCF Ship#9 \$22.23

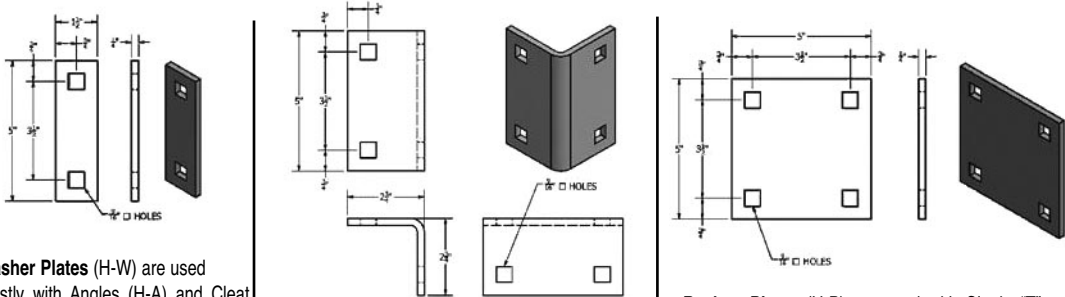

Single "T" Female (H-SF) has two 1/2" tabs and is used with an Outside Corner Male (H-OCM) or a Single "T" Male (H-SM). Both male and female singles can be bolted to the side of a dock to make finger attachments. They can also be bolted to seawalls to make ramps. H-SF Ship#4 \$13.04

Single "T" Male (H-SM) has one 1/2" tab and is used with an Outside Corner Female (H-OCF) or Single "T" Female (H-SF). H-SM Ship#3 \$9.22

WOOD DOCK HARDWARE

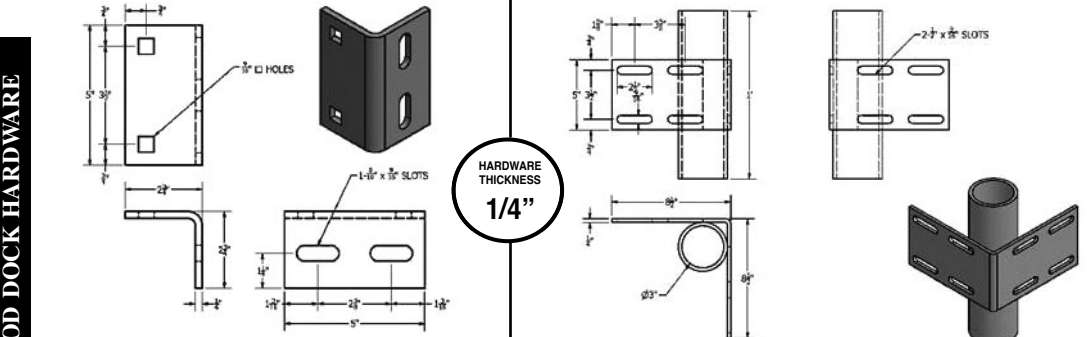

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

Washer Plates (H-W) are used mostly with Angles (H-A) and Cleat Angles (H-CA). The square hole in the plate keeps the carriage bolts from turning when the bolts are tightened. H-W Ship#1 \$1.24

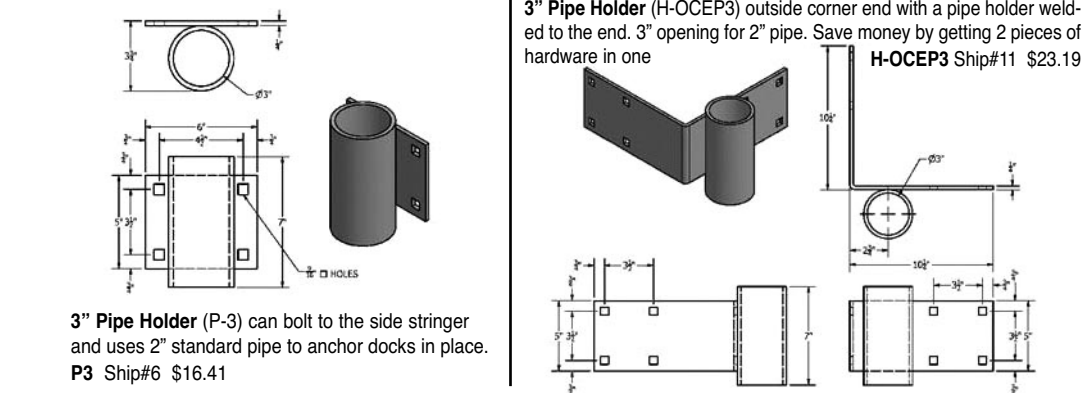

Angles (H-A) used to hold all cross stringers to side stringers using a Washer Plate (H-W). The wood is sandwiched between the steel and creates a solid corner. H-A Ship#2 \$3.45

Backup Plates (H-B) are used with Single "T" Males (H-SM) and Single "T" Females (H-SF) for additional strength and to keep bolts from pulling through the wood. H-B Ship#2 \$3.30

Cleat Angles (H-CA) have slots for various sizes of cleats. The cleat angle is bolted to the side stringer using a Washer Plate (H-W). The cleat is then bolted through the deck into the cleat angle. This keeps the cleat from pulling out of the deck. H-CA Ship#2 \$4.88

Inside Corners/3" I.D. Pipe Holder (H-IC3) has a 3" I.D. pipe holder welded in place. It can be used to replace a regular inside corner. It will accommodate a 2" I.D. pipe. H-IC3 Ship#13 \$26.31

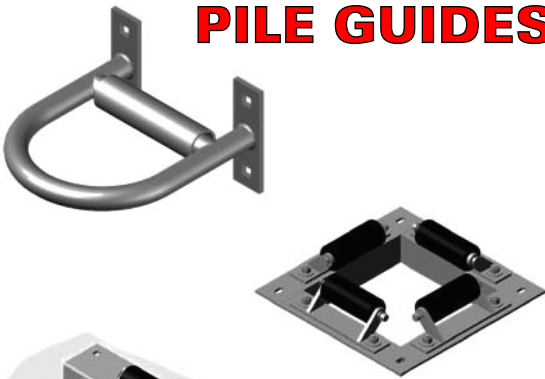

3" Pipe Holder (P-3) can bolt to the side stringer and uses 2" standard pipe to anchor docks in place. P3 Ship#6 \$16.41

3" Pipe Holder (H-OCEP3) outside corner end with a pipe holder welded to the end. 3" opening for 2" pipe. Save money by getting 2 pieces of hardware in one H-OCEP3 Ship#11 \$23.19

WORLD WAR 2 LCI-713 SENDS \$.O.\$. - PORTLAND, OR – The nonprofit Amphibious Forces Memorial Museum (AFMM) has broadcast a financial “Save Our Ship” to help preserve LCI-713, the only Amphibious Landing Craft Infantry still afloat and looking as it did in World War II. LCIs were at D-Day on June 6, 1944. LCI gunboats blasted Japanese gun emplacements at Iwo Jima before the Allied invasion of February 1945. Since 2005 LCI-713’s volunteer crew has restored the ship to almost the way it looked – above the waterline. The hull has never been out of water since 1944 and is worn very thin. AFMM owns enough 5/16th steel plate to replace or re-plate the hull. Although LCI-713 is moored at Portland’s Swan Island lagoon, near Vigor Marine Services, AFMM lacks the means and money to put the 158 x 23-foot ship into dry dock. According to AFMM president Rick Holmes, “We need a large barge in Portland, onto which the ship can be lifted, where repairs can be made as time and our resources permit, and at far less cost.” Holmes is hopeful a marine services company will donate the rental of a 200 x 40-foot barge for up to a year. Such a barge, Holmes notes, might be considered a “boat,” and thus, under IRS rules, could qualify the owner for a tax-deductible contribution to AFMM, a 501c3 qualified nonprofit organization. LCI-713 is open for visiting on Saturdays only from 1000 to 1600. Contact AFMM President Rick Holmes prior to visiting. Wilson pontoons are used for pontoon boats, houseboats, barges, bridges, work boats, party boats, pumping stations –they're perfect for any application that uses pontoons. Features include:

- Molded from sturdy, medium density polyethylene (MDPE)
- Heavy-duty:** modules have 1/4" - 3/8" thick walls and are filled with closed cell polyurethane foam for greater structural stability–Wilson pontoons will withstand greater impact than aluminum pontoons
- Modular:** separate bow, middle, and stern modules allow for configurations of the most popular application sizes
- Rectangular collar has threaded stainless 3/8" molded inserts for quick attachment
- Maintenance free:** no bottom painting is needed–just pressure-wash to clean
- UV protected

OCEANUS - LED MARINE UTILITY LIGHT

The Oceanus LED Utility light fixture is designed to replace fluorescent light
 fixtures in applications where long life, minimal maintenance, and low
 power consumption are important considerations.

A 3900K Natural White color is used to achieve the
 best CRI and there are versions with an added
 red or blue color circuit for nite time illumination.

The fixture can be flush mounted or surface
 mounted with supplied bezel.

Available in 85v-265vac, 10v-30vdc and a dual
 circuit 85v-265vac + 10v-30vdc.
