Powered By Kubota

Phasor Marine, has begun delivering EPA Tier IV compliant marine generators. These machines are not utilizing EPA flex credit engines as are other marine generator manufacturers, which is illegal. The Kubota diesel engines utilized by **Phasor** are either Tier IV Final or EPA Tier IV Marine Certified up to and including the K4-30.0 kw model. All standard machines continue to utilize the Kubota or John Deere diesel engines coupled to the electrical ends. These engines approved for use with Bio-Diesel B5. New for the 2014 model year are two Ignition Protection Certified models rated at 4.5 kw and 7.0 kw operating at 1800 rpm. These machines are certified for use in gasoline powered boats. All **Phasor's** continue to offer a 5 year limited warranty.

K3 - 9.5 KW

**WE SHIP GENERATORS

"Tracking pipes & cables is easier and cheaper with Fishers PT-1 and CT-1"

CT-1
Cable Tracking System
Only \$15,995

PT-1
Pipe Tracker
Only \$3,995

Fishers CT-1 Cable Tracking System was specifically designed to locate and track buried power and communications cables.

The system will locate and track cables on land or underwater and will locate faults or breaks.

Fishers PT-1 pipe tracker locates deeply buried iron and steel pipes, even when they're in close proximity to other metal objects.

Questions to ask before ordering your sectional barge:

1. Will my barge be designed by experienced engineers?
2. Will my barge be built to my exact requirements?
3. Will my complete satisfaction be guaranteed?

If it's important that the answer to these questions is "YES", then contact us at:

RPS Barge Co.

Built to your requirements.
Built to last. Guaranteed.

WOOD DOCK HARDWARE

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

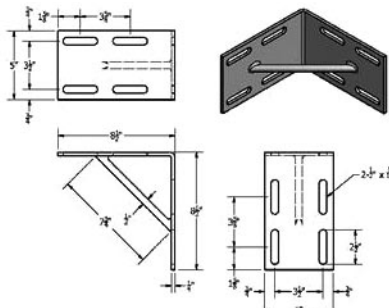

Outside Corner End (H-OCE) is used at the ends of fingers, ends of dock or for swim platforms.

H-OCE Ship#7 \$12.98

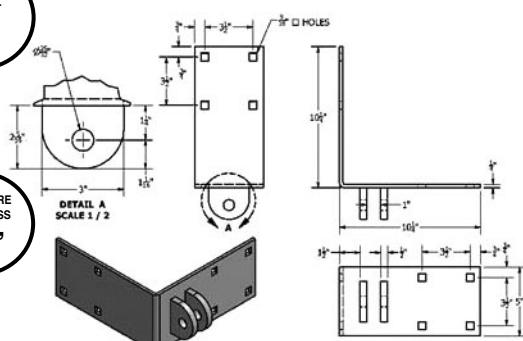

Outside Corner Male (H-OCM) has one 1/2" tab and a hole for a 3/4" bolt or B-PIN. Would be used with an Outside Corner Female (H-OCF) or with a Single "T" Female (H-SF). H-OCM Ship#8 \$18.71

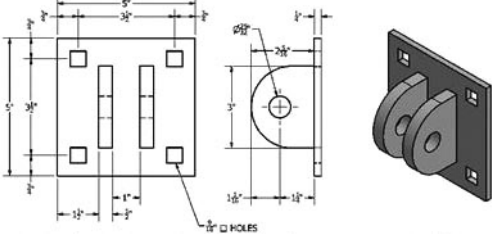

Inside Corner (H-IC) has slots and can be used with 1-1/2" - 3" thick wood. The inside corner sandwiches the wood between the opposite outside corner, keeping bolts from burying themselves in the wood. A corner gusset gives the unit a lot of strength and helps from racking the dock. H-IC Ship#7 \$13.95

HARDWARE HEIGHT
5"

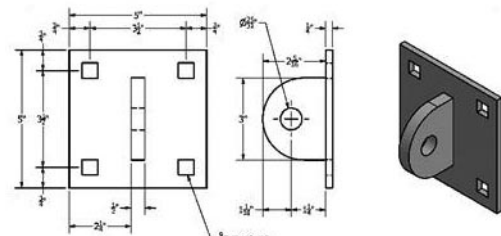

HARDWARE THICKNESS
1/4"

Outside Corner Female (H-OCF) has two 1/2" tabs and a hole for a 3/4" bolt or B-PIN. Would be used with an Outside Corner Male (H-OCM) or with a Single "T" Male (H-SM). H-OCF Ship#9 \$22.23

Single "T" Female (H-SF) has two 1/2" tabs and is used with an Outside Corner Male (H-OCM) or a Single "T" Male (H-SM). Both male and female singles can be bolted to the side of a dock to make finger attachments. They can also be bolted to seawalls to make ramps. H-SF Ship#4 \$13.04

Single "T" Male (H-SM) has one 1/2" tab and is used with an Outside Corner Female (H-OCF) or Single "T" Female (H-SF). H-SM Ship#3 \$9.22

WOOD DOCK HARDWARE

MERCO MARINE

Merco Marine is a manufacturer of boat dock building components and accessories. We were established in 1979. Everything we manufacture is made in the United States, with US Steel, and US workers.

The products shown here are only a small portion of the over 2000 items that we manufacture and keep in inventory for boat dock building and marinas.

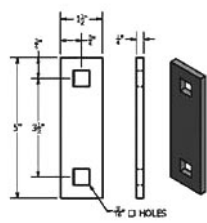

For a complete list of our products check us out on the web at www.mercoboatdocks.com or give us a call at 304-737-3006. You can also request a free copy of our 65 page catalog.

Merco Marine can provide simple parts and pieces for your small pond or lake dock to build on site, or we can build entire marinas from start to finish.

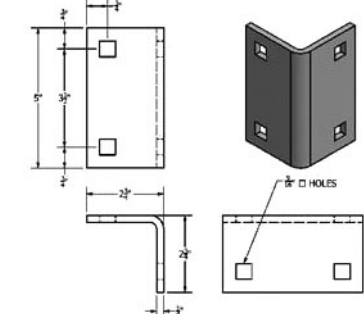

WOOD DOCK HARDWARE WWW.MERCOMARINE.COM 1-304-737-3006

WOOD DOCK HARDWARE

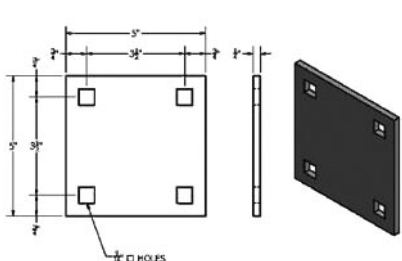

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

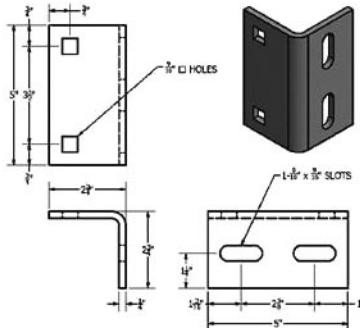

Washer Plates (H-W) are used mostly with Angles (H-A) and Cleat Angles (H-CA). The square hole in the plate keeps the carriage bolts from turning when the bolts are tightened. H-W Ship#1 \$1.24

Angles (H-A) used to hold all cross stringers to side stringers using a Washer Plate (H-W). The wood is sandwiched between the steel and creates a solid corner. H-A Ship#2 \$3.45

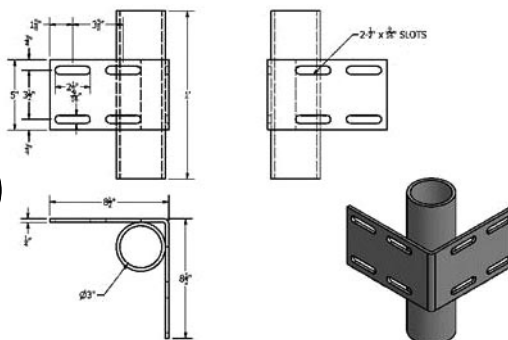

Backup Plates (H-B) are used with Single "T" Males (H-SM) and Single "T" Females (H-SF) for additional strength and to keep bolts from pulling through the wood. H-B Ship#2 \$3.30

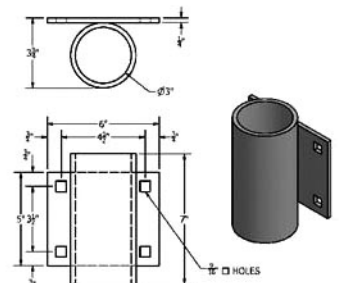

Cleat Angles (H-CA) have slots for various sizes of cleats. The cleat angle is bolted to the side stringer using a Washer Plate (H-W). The cleat is then bolted through the deck into the cleat angle. This keeps the cleat from pulling out of the deck. H-CA Ship#2 \$4.88

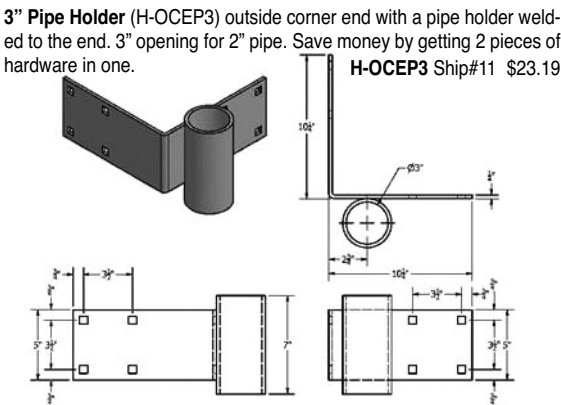

HARDWARE THICKNESS
1/4"

Inside Corners/3" I.D. Pipe Holder (H-IC3) has a 3" I.D. pipe holder welded in place. It can be used to replace a regular inside corner. It will accommodate a 2" I.D. pipe. H-IC3 Ship#13 \$26.31

3" Pipe Holder (P-3) can bolt to the side stringer and uses 2" standard pipe to anchor docks in place. P-3 Ship# 6 \$16.41

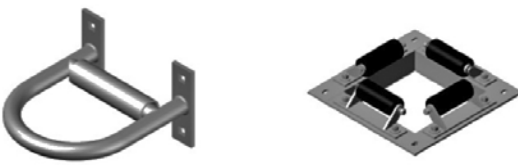

3" Pipe Holder (H-OCEP3) outside corner end with a pipe holder welded to the end. 3" opening for 2" pipe. Save money by getting 2 pieces of hardware in one. H-OCEP3 Ship#11 \$23.19

NAVATEK I SWATH Excursion Vessel

Main Characteristics
Length Overall: 131'
Length Lower Hull: 120'
Length at Waterline: 112'
Beam Overall: 53'
Draft Operating: 12'
Draft Minimum: 10'
Displacement: 365 LT
Main Engines: Deutz MWM 16V-816CR
Horsepower: 1325bhp each

Capacities
Ballast Tanks: 23,000 gallons
Fuel: 5,000 gallons
Potable Water: 1,000 gallons
Sewage: 500 gallons

For Additional Information visit:
<http://www.vogelequipment.com/project/navatek-i/>

Vogel Equipment LLC Announces the Sale of the NAVATEK I SWATH Excursion Vessel

Certified by the U.S. Coast Guard to carry as many as 430 passengers and crew on an ocean route, the Navatek I was the first SWATH in the world to be classed by ABS, +A1 Ferry, Hawaiian interisland service, +AMS. A SWATH ship is designed to radically reduce ship motions—pitch, heave and roll—caused by waves. The SWATH ship's most unique market advantage is the virtual elimination of seasickness. Compared to a conventional mono-hull or catamaran, it also offers greater maneuverability, more usable deck space, and can maintain greater speed through rough waters. Despite operating in rough ocean seas of 4-12 feet all year long, the passenger seasickness rate has maintained at being less than 1 percent. The hull of Navatek I was built by Thompson Metal Fab, Vancouver, Wash.; she was outfitted by Northwest Marine, Portland, Ore.; and Trinity Marine Group, Gulfport, Miss., built her superstructure. The structural design of the vessel consists of two demi-hulls, connected by a cross-structure consisting of two box beams. There are two vertical struts per side which connects the lower hulls to the upper structure. The lower hulls have hemispherical endcaps at the bow. Aft of this are two cylindrical lengths of hull of circular cross section. The deckhouse is mounted on flexible mounts. Navatek I is 140 feet long, has a beam of 53 feet, displacement of about 365 tons, and variable draft ranging from 8 to 12 feet. She is powered by two Deutz MWM 16V- 816CR diesel engines, rated at 1,350 hp each, fitted with Ulstein reduction gears driving Ulstein controllable- pitch, four-bladed propellers. Auxiliary power is provided by two GM 6-71-powered generators rated at 99 kw each. Includes complete spare parts package, including spare engine.....\$1.75 million, FOB Honolulu or FOB Ensenada, Mexico

OFFSHORE FIRE RESCUE 1 • 12,000 GPM FOR SALE

A RAPID RESPONSE 27+ KNOTS FIRE RESCUE VESSEL

Main Characteristics
Length Overall 33.5 m (110.00 ft)
Beam 6.7 m (22.0 ft)
Draft 1.9 m (6.50 ft)
Displacement 126 tons
Speed 27+ knots
Capacities
Fuel Oil 5.7 m3 (1,500 gal)
Foam 3.8 m3 (1,000 gal)
Fresh Water 0.4 m3 (100 gal)
Registration
Type Firefighting Craft
Designer Guido Perla & Associates, Inc.
Owner Vogel Equipment LLC
Builder Halter Moss Point Marine

Vogel Equipment LLC announces the sale of the Offshore Fire Rescue 1 vessel. Builder Halter Moss Point Marine, Inc., Escatawpa, Miss., a member of the Trinity Marine Group. The vessel is equipped with four water monitors or nozzles with a collective capacity of up to 12,000 gallons per minute of water and foam. One of the fire monitors is located atop a telescoping tower which can rise 50 feet above the water to allow placement of a stream on the deck of a large ship in ballast. The vessel was designed by Guido Perla & Associates, Inc., Seattle. Propulsion and pump power is provided by two Detroit Diesel 16V92TA engines developing 1,100 horsepower at 2,100 rpm. The Generators are 2 x Detroit 353 Generator @ 180 KW. They drive fixed-pitch propellers through two Twin Disc marine transmissions. 2 x 6,000-gpm fire pump is driven off of each propulsion engine through a front mounted pump with Fawick air clutch. Fire suppressant foam is supplied from stainless steel tanks located below decks. The vessel's four fire monitors include one 5,000-gpm remote operated unit mounted on the foredeck, two 2,500-gpm manually operated water monitors on the bridge deck aft, and one 2,000-gpm remote operated foam/water monitor on top of the pilothouse. Starting, operating, and stopping of the propulsion, electrical, and firefighting systems is automated for control from the wheelhouse, and the vessel and all systems can be operated by a crew of two. This great vessel from Hawaii was made for rapid intervention response is a very special made vessel with towing capacity capabilities. Vessel formally known as Moku Ahi.

\$1.75 million, with an Additional \$300,000 Spare Parts Package, All Offers Considered.
Additionally, If Someone Identifies a Buyer to Us and We Complete the Sale with that Party, that Person is Entitled to a 20% Commission of the Gross Sale.

email: info@wilsonpontoons.com

Wilson pontoons are used for pontoon boats, houseboats, barges, bridges, work boats, party boats, pumping stations—they're perfect for any application that uses pontoons. Features include:

- Molded from sturdy, medium density polyethylene (MDPE)
- **Heavy-duty:** modules have 1/4" - 3/8" thick walls and are filled with closed cell polyurethane foam for greater structural stability—Wilson pontoons will withstand greater impact than aluminum pontoons
- **Modular:** separate bow, middle, and stern modules allow for configurations of the most popular application sizes
- Rectangular collar has threaded stainless 3/8" molded inserts for quick attachment
- **Maintenance free:** no bottom painting is needed—just pressure-wash to clean
- UV protected

MECHANICAL REQUIREMENTS FOR DISPLAY ADVERTISING

1. Printing process: Web offset.

2. Binding method: Saddle stitched.

3. Trim size 10-1/4" wide by 17" deep

4. 4 column page format.

5. Width of single column: 2-1/4" (14 picas)
Width of two columns: 4-3/4" (28-1/2 picas)
Width of three columns: 7-1/4" (43 picas)
Width of four columns: 9-3/4" (58-1/2 picas)

6. Depth of column: 16-1/4"

7. Minimum size space unit; one column in. (2-1/4"W x 1"D)

8. All display ads must be full inches (no fractions).

9. Ad must be as many inches in depth as it is columns wide.

10. Publisher accepts: Negatives (right reading emulsion side down); repro proofs; camera-ready art; copy to be set in type. For best results, we recommend the submissions of quality white proofs rather than negatives. (Mail repro proofs flat or in mailing tube).

11. Black and white halftones: 80 to 100 line screen.

12. For best quality, submit clear sharp photos.

13. Page number or position on page not guaranteed.

14. Contract advertisers are entitled to one complete change of copy every three issues. When change of copy is not received by closing date, copy run in previous issue will be inserted.

15. The publisher assumes no liability if for any reason it becomes necessary to omit any advertisement.

16. No cancellations or changes in orders will be accepted after closing dates.

**Manufacturing Cost Effective,
 Polyurethane Foam for
 Flotation and Insulation
 in the Marine Industry
 (MIL-P-21929C Compliant).**

Uses:

- Greatly extend the life of otherwise ready to retire barges, boats, docks, and more...
- Save tens of thousands of dollars over replacement or repair costs.
- Insulate spaces requiring efficient temperature control (i.e. living quarters, storage to prevent freezing or storage for cooling/freezing).

Installation:

- Our installers will come to you.
- We also offer do-it-yourself training and sell the necessary equipment for your business to install.

PASSENGER VESSEL

Asking \$3,450,000

For Sale, Lease or Joint Venture
Owner Will Consider Financing

The M/V Deacon is an 120' x 43' all aluminum vessel designed to transport 250 passengers at 30 knots. The swath design provides dramatically better ride in high seas than a mono-hull or a catamaran vessel.

How does the swath compare to a conventional vessel?
Watch our online video.

**Possible Uses:**

- Crew Boat • Yacht • Dinner Cruises
- Whale Watching • Research Vessel • Casino
- Military • Passenger Ferry • Seismic Vessel
- Live Aboard Dive Vessel • Dive Support Vessel

Thermal Insulation Blanket Kits

PART #	PRICE
TIB-3-4 3" & 4" Exhaust Connector 1" Thick & 18" Long x Circum.	\$45
TIB-5 5" Exhaust Connector 1" Thick & 18" Long x Circum.	\$60
TIB-6 6" Exhaust Connector 1" Thick & 18" Long x Circum.	\$70

• Crafted from high-purity alumina-silica ceramic fiber blanket and woven fiberglass impregnated with silicone resins. Blanket is firmly stitched with Kevlar thread and is reusable.
• Resists damage, absorbs sound, suitable for operating temperatures up to 1000° F.
• Thermal and physical properties are restored after drying if water, steam or oil wets TIB-kit.
• Built to wrap circumferences in multiples of 6" (6", 12", 18"+) or spiral wrap around long lengths. (Custom widths available)
Fire resistance - meets requirements for combustibility as specified by U.S. Coast Guard 164.009

We Stand by our work.
