

**Global People's Assembly  
17 – 18 September 2030  
UN Church Center  
New York**

**Small group work & presentation.**

**Session: Finalize the Declaration on day 2**

This is online participants' group work. Presented at large group by GCAP representative

(note: Colored text are the issues raised by VUCP and written by VUCP participant online)

**Climate**

- The development of technology to realize sustainable to increase the production of nature food in affordable price for the people is our consentation.
- In develop of technology to realize sustainable to increase the green (nature) Energy in affordable price for the people is our consentation
- Protection of the sea walls

**Summit Of The Future**

- What after 2030? Will we keep the same goals? How do we address the systemic issues and longer periods of history, factoring in social barriers - inequality and poverty
- Focus to Increase equal distribution of social justice for all citizens of the world by placing the UN as a foster father for poor or underdeveloped countries.

**Comment [A1]:** Under this topic VUCP raised 2 issue 1. What after 2030, & 2. World Peace

**World Peace**

**The UN is once again maximizing its function of maintaining world peace by prioritizing mutual cooperation, mutual assistance and equality/equality of rights and obligations between nations.**

In addition to maximizing the role of states, it gives civil society, along with nations and countries within the UN, the right to participate in strategic policy making in various UN strategic decisions. Because UN policies will concern or have an impact on a nation or all citizens of the world. So the voice of the people should be the main focus to be accomodated UN

**Financing for Development**

- On poverty reduction - SDG 1 and 2 by 2030 - are we going to achieve them?
- Peace, financing for peace
- Basic Education for all (12 years) instead of education for all (now its emphasis on non formal or primary level)
  - UN mandate (Article 26 of UDHR) that fundamental/basic education should be 12 years which is quality higher education for all, but now we are working on elementary/primary education only, this should be expanded to the 12 years as in the UN mandate.

**Mobilisation**

- On SGD accountability, no legal obligation, more effective and attainable - how can we measure them effectively
- Involve silent portion of the people, how we can mobilise people who are not engaged in these processes, fail to involve them to hear their voices, issues of accessibility
