How can we find our way during these turbulent and changing times? What resources can we draw upon when things go wrong? Where can we find true inspiration and guidance for living a complete and fulfilled life?

In this short but impactful book, astronomer Stephan Martin suggests that including a cosmic perspective in our daily lives can provide us with resources and perspectives that can help us navigate crisis, change, and transformation with grace and resilience. Drawing on insights from modern cosmology and the evolutionary perspective, he shows us that we can find sources of support, renewal, and guidance that can sustain us through the challenges we face personally, culturally, and globally at this critical time.
