Art, demons, and death. Seattle is On the Verge. **2016 BookLife Prize Quarterfinalist**

"The sinewy plot...provides a solid matrix for imaginative insights into the relationship between art, creativity, and myth that hold the tale together." - **Critic's Report, 2016 BookLife Prize**

Freya is just a university student worried about grades and tuition until a gorgeous succubus interrupts her post-exam latte with a proposition: come work for her boss, Seattle's reclusive heiress and antiques collector Imogen Beldame. Eagerly agreeing despite a nagging feeling in the pit of her stomach, Freya finds herself swept up in a deadly quest at the behest of her psychopathic new employer. Beldame has given her until Halloween to collect three magical pigments that hold the key to crafting mesmerizing portraits that can access the Verge, a borderland on the edge of human reality, and the powerful beings that call it home.

Freya's reluctant journey takes her to a goblin stronghold in the Cascades for the color blue, to the Seattle Underground to request the color red from Baba Yaga, and to the Fremont home of a beautifully gruesome Cambodian ahp, or spirit of the night, for the color yellow. Working together with Rusty, an enigmatically disfigured man intimately connected with the Verge, and a motley crew of mercurial demons, Freya must come up with a plan to stop Beldame and preserve the fragile balance between fantasy and reality that is at its most vulnerable on Halloween.
