Or Search For "Binary Options 2015 Diary"

This book has been written by **Vernon Lees** who has been successfully trading and investing the financial markets with Binary Options also known as Fixed Odds for over 10 years.

The Binary Options Trading System In A Diary offers a simple "automatic" trading system for the year ahead which virtually anyone can follow.

The book covers:-

The Strategy - Details of the strategy and its basis of statistical and mathematical analysis

The Trade Types - An explanation of the medium term trade types used and how to use them

Using the Diary - How to implement the strategy on your own account

The Signals - A full list of trades, in date order, offering a 60%+, 65%+ and 70%+ historical chance of success

The diary is based on my own daily, weekly and monthly analysis which I conduct across a range of financial instruments, including Forex, Indices and Commodities on an annual basis.

It provides an 'automatic' Binary Options trading system which is based on historic mathematical probabilities. It highlights trading opportunities where there is a high probability chance of winning.

From the Author

Although this diary is not my core trading strategy I have been compiling, sharing and trading this high probability trading system since 2008. It is so simple to trade and time efficient that I use it to complement my other trading strategies. I consider the consistent returns I make from this as my 'pocket/holiday money' for the year.

The analysis in this Diary allows me to identify High probability weekly and monthly trading opportunities up to 12 months in advance. This helps me to plan my trading, effectively setting it on autopilot. Now, thanks to Amazon Self Publishing the signals from this system can easily be compiled and shared as a diary.

BONUS - Also includes all trades for January and February 2015!

IMPORTANT: This book contains a high probability trading strategy for Binary Options. It does not provide or constitute investment advice.
