Review

"I never met a computer I didn't hate, until I fell in love with Larry Kilham's Juno. Part woman yet all brilliant machine, Juno is the pulsing supercomputer at the heart of Love Byte, Kilham's fast paced thriller that explores a central question of our future -- what will be in charge, natural intelligence or artificial intelligence? The science is up to the minute, and perhaps ahead of its time. That alone can keep you awake at night -- whether you are human or a machine." ~ Robert Mayer, National award winning author of Superfolks, The Dreams of Ada, and The Origin of Sorrow

Product Description

Juno is a super intelligent AI computer developed by the U.S. government to conduct social media attacks against enemies foreign and domestic. She is the first AI Computer programmed with emotions and conscience. She has an emotional bond with her developer, Tom Renwick, a computer scientist. Juno, Tom and their boss, Dr. Erwin Krakouer, the mad National Security Advisor, struggle with issues of trust and emotion. The involvement of Dido, a lady computer empire builder and sometimes girlfriend of Tom, and the Chinese cyber warfare agency add to the tension.

Love Byte explores emotion and conscience in super AI computers and their ability to partner with humans. In the changing ecology engendered by scarcity of critical resources, can humans' creativity and ability to work with computers lead to continued survival and prosperity?
