DUG Bakken and Rockies 2021

WHAT TO EXPECT IN 2021

The Bakken's Top Producers Gather here

The 2021 **DUG Bakken and Rockies Conference & Exhibition** will provide a comprehensive overview of unconventional oil and shale gas plays throughout this region. Armed with mountains of technical data from legacy companies like Chesapeake and Devon Energy, operators and producers in the Powder River Basin, Bakken, Three Forks, Niobrara, Codell, Mancos, Parkman, and Turner/Frontier plays are in search of experimental strategies to increase returns. As new trends and technologies make their way to the forefront, many companies look to the **DUG Bakken and Rockies Conference & Exhibition** to discover the latest and greatest in drilling and completions.

Each year, Hart Energy is committed to provide oil and gas professionals with a comprehensive look at business activities from one of the industry's premier shale play. To ensure its sponsors and exhibitors get access to qualified prospects, Hart Energy reaches out to oil and gas and midstream operators with incentives designed to bring their most influential managers to the conference.

WHO ATTENDS DUG BAKKEN AND ROCKIES

The **DUG Bakken and Rockies** provides opportunities for industry leaders to stay current on emerging trends and markets. Attendees at DUG conferences come from:

- E&P Companies
- Pipeline Operators
- Financial Firms (i.e. Investors, Bankers, Analysts, etc.)
- Industry Consulting Firms
- Law Firms
- Service & Supply Companies
- Government Agencies
- Other Professional Services Firms

Sampling of producers that attend **DUG Bakken and Rockies**:

- | | |
|------------------------------|-----------------------------|
| ■ Anschutz Exploration | ■ Oasis Petroleum |
| ■ Antero Resources | ■ PDC Energy |
| ■ Bison Oil & Gas | ■ QEP Energy |
| ■ ConocoPhillips | ■ Riverbend Oil & Gas |
| ■ Continental Resources Inc. | ■ Samson Energy |
| ■ Devon Energy | ■ Saudi Aramco Oil Company |
| ■ Extraction Oil & Gas LLC | ■ Tellurian |
| ■ HighPoint Resources | ■ Western Natural Resources |
| ■ Inflection Energy | ■ Whiting Petroleum |
| ■ Kelly Oil & Gas | ■ XTO Energy |
| ■ Marathon Oil Company | ■ Zena Energy |
| ■ Noble Energy | |

Hart Energy has already started its 2021 marketing for **DUG Bakken and Rockies**. This includes:

ADVERTISING — Advertisements are running in our leading publications, *E&P Magazine* and *Oil and Gas Investor*, to entice attendees.

PUBLIC RELATIONS — Releases on upcoming speakers and presentation topics.

E-NEWSLETTERS — through our industry newsletters — *Morning Rush*, *Daily Wrap-Up*, *Breaking News*, *A&D Alert*, *Energy Pulse*, *Tech Direct*, *A&D Watch*, *E&P Buzz*, *Midstream Monitor*, *Shale Weekly* and *Weekend Replay*.

ONLINE — Regular updates posted to *HartEnergyConferences.com*, search engine optimization, and marketing on prominent websites via Google AdWords.

SOCIAL MEDIA — Engaging posts highlighting the agenda, upcoming speakers and additional conference features, including forums, workshops, and celebrity book signings.

If your marketing team is rolling out new technology or re-introducing an existing technology we want to assist you and our network wants to hear about it!

DUG *Bakken and Rockies* 2021

BENEFITS OF EXHIBITING

BECOME AN EXHIBITOR AND SPONSOR

As producers throughout the Bakken and Rockies and Northern Great Plains carve out profit margins and sit on an arsenal drilled but uncompleted wells (DUCs), many look to the **DUG *Bakken and Rockies*** to learn about the best technologies, services and companies to help them achieve a profitable rebound.

While companies are eager to learn how to capitalize on the region's brimming potential, the **DUG *Bakken and Rockies*** conference is the premier meeting grounds for exhibitors and sponsors to reach an executive-level audience from public and private producers and midstream operators. Will you be there to meet them?

Plays Covered:

Powder River Basin, Bakken, Three Forks, Niobrara, Codell, Mancos, Parkman, Turner, Frontier

Cost to Exhibit - \$3,000 and includes:

- 10 ft. x 10 ft. exhibit space (100 sq. ft. minimum)
- Listed on the **DUG *Bakken and Rockies*** online exhibitor floor plan with a link to your website
- Complimentary Exhibit Hall Only registrations for two (2) employees per 100 sq. ft. of exhibit space
- Option to upgrade Exhibit Hall Only to full-conference passes at a discounted rate
- Discount on additional booth staff passes
- Ability to invite qualified clients and prospects to the exhibition hall at no charge through the Operator Pass Program
- Access to all networking breaks and receptions
- Option to add the following complimentary items per 100 sq. ft. of exhibit space:
 - One (1) 6 ft. table
 - Two (2) chairs
 - One (1) wastebasket
- Pipe and drape with a company ID sign
- Option to purchase additional full-conference passes at a 30% discount

Sponsorship benefits include:

- Premium booth location
- Unique access to a select group of industry executives
- New sales leads and opportunities to solidify customer relationships
- Increased brand awareness
- Ability to showcase new products/services to a targeted audience
- Multiple reference listings for your company (including an online profile)
 - On the conference website
 - In the conference Pocket Guide
 - On the conference mobile app

WHY SPONSOR?

DUG *Bakken and Rockies* sponsorships give companies exposure to key decision makers in the unconventional resources market. Sponsors have opportunities to increase brand awareness, obtain valuable leads and connect with thousands of potential clients - all in one venue!

Let us work with you to build a sponsorship package that meets your marketing objectives and budget. Contact a sales representative today to learn more about our sponsorship packages.

Many high visibility sponsorships are available and specialty sponsorships can be accommodated.

TYPICAL SPONSORSHIPS INCLUDE:

- Premier Level Sponsor
- Platinum, Gold, Silver and Bronze Sponsors
- Opening Reception Sponsor
- Speaker Dinner Sponsor
- Late Night Networking Mixer Sponsor
- Networking Breakfast Sponsor
- Morning Refreshment Sponsor
- Networking BBQ Luncheon Sponsor
- Afternoon Energy Break Sponsor
- Ice Breaker Sponsor
- Registration Sponsor
- Lanyard Sponsor
- Floor Plan Sponsor
- Exhibit Hall Sponsor
- Follow Me to Registration Sponsor
- Welcome Banner Sponsor
- Host Hotel Key Card Sponsor
- Conference Session Sponsor
- Shoe Shine Station Sponsor
- Speaker Gift Sponsor
- Exhibit Hall Water Bottle Sponsor
- Food & Beverage Lounge Sponsor
- Presentation Room Water Bottle Sponsor
- Conference Bag Sponsor
- Seat Caps Sponsor
- Event Koozie Sponsor
- Pen Sponsor
- Pocket Guide Sponsor
- Coffee Sponsor
- Premier Bingo Sponsor
- Bingo Square Sponsor
- Charging Station Kiosk Sponsor
- Operator Program Sponsor
- Pocket Guide Full Page Ad
- Attendee Postcard (Direct Mail Piece)
- Conference Bag Insert
- Premier Event APP Sponsor
- Event Website Page Peel
- Post-Conference Presentation Email
- Conference & Exhibition Video

SHOW REPORT

DUG *Rockies* 2019 Conference Highlights

DENVER—It was 20 years ago when Big Sky Country started its journey into Big Oil country. It was a small group of determined dreamers who applied an entrepreneurial spirit to horizontally drill Burning Tree State 36-2H in Richland County, Mont. The Bakken was suddenly at the center of the American oil revolution.

Among them was a prospector, who told Hart Energy he was asking for just one more chance in the Middle Bakken, a young Halliburton engineer with a lot of creativity, and two partner operators with a lot of patience. Two of those men, and the son of another, were on hand to tell their story and receive commemorative awards at Hart Energy's **DUG Bakken and Rockies Conference and Exhibition** at the Colorado Convention Center on Feb. 19.

Two decades later, nearly 800 oil and gas professionals gathered to look at the future of the Bakken Shale in Montana and North Dakota as well as Wyoming's Powder River Basin and Colorado's Niobrara. It's hard to say if they'd all have been here without the efforts of **Dick Findley, Kumar Ramurthy and Bob Robinson**, among others, but the frack job they did on May 26, 2000, showed that oil molecules weren't too big to flow through a horizontal well. The rest, as they say, is history. History, that is, still in the making.

The celebration was only part of the activities. Despite post-Senate Bill 19-181 (SB19-181) life in Colorado, low commodity prices everywhere, poor investor sentiment about shale and the specter of political battles over climate change causing the industry sleepless nights, many of the attendees remained upbeat about the future of the region.

"What I have seen that has been unusual is that people have been very creative and willing to collaborate more than in the past," said **Samantha McPheter**, president and CEO of data software provider eLynx Technologies LLC, at the company's booth on the exhibit floor. "Everyone is looking for new and unique ways to do business development so they are more open to some partnerships.

"It works for us because we are also strategically looking at what we need to do differently. It's just a different time and industry is in a different place," she continued. "You can't do the same things and expect different results."

One of those innovations making its way into the Bakken is enhanced oil recovery (EOR). **Liberty Resources II LLC's** vice president of business development, Gordon Pospisil, took the stage at the conference to offer results of a Bakken pilot well using EOR. He showed how gas injection "huff 'n puff" EOR can work for tight oil. He said produced gas works like CO₂ in light, tight oil.

In addition, he said capital efficiency can be dramatically improved and that EOR is a driver for M&A activity. Pospisil said it creates new business opportunities like rental compression and gas injection services.

Another company using innovative drilling technology in the Bakken is Hess Corp. **Dougie McMichael**, director, Bakken Well Factory for Hess Corp., told Hart Energy the company is having great success with its plug-and-perf completion design. "We've increased IP180 production rates by 15% by doing that," he said.

Another operator on hand to talk about the Williston Basin was **Jay Knaebal**, vice president of Oasis Petroleum, who said his company is focused on moderate growth, significant cash flow and a strong balance sheet in the play.

Meanwhile, back in the exhibit hall service companies with interests in both the Bakken and the Rockies were still getting business done despite the tough market conditions.

"The show's been great. All of our customers and prospects are speaking. We're getting a few leads out of our poly-pipe offering," said **Jeff Jumonville**, vice president of sales for production equipment at Dragon Products PES Inc., a Beaumont, Texas-based maker of production equipment with a significant footprint in the Rockies due to its 2018 acquisition of Casper, Wyo.-based FabTech from Nalco Champion.

Jumonville said business has been good in the Rockies and Bakken. The company maintains three of its six facilities in the region. "Maybe Wyoming's been a brighter spot over the last couple of years," he said. "We're getting more business on the midstream side in the Bakken."

With the Powder River Basin seeing a surge in interest and the buildout of infrastructure in the Bakken, the better business environment in those two areas stands to reason.

What doesn't necessarily stand to reason is the tendency of the industry to dismiss anti-fossil fuel activists in a state that less than a year ago pushed through SB19-181, which put surface rights for drillers in the hands of local authorities. For the record, no anti-fossil fuel protestors showed up at **DUG Bakken & Rockies**.

And while operators in the region work with anti-fracking activists and state and local governments during the rulemaking phase in Colorado to implement SB19-181, **Tisha Schuller**, former Colorado Oil and Gas Association (COGA) president and CEO turned energy thought leader, issued a warning to the audience.

"There is clearly an anti-fossil fuel mindset out there and as much as we want to dismiss it, it's important to understand it. It is an existential threat," she said.

In a lighthearted moment, she told the oil and gas industry crowd, "It's nice to talk to a group of people who don't have 'frack off' taped to their heads."

She urged industry leaders in the audience to understand the aspirations of the opposition and focus on listening to build trust. “There is a time for education but that’s after building trust and relationships,” she said, urging the industry to “reframe the opposition as an opportunity.”

Earlier, PetroNerds’ founder **Trisha Curtis** said, “We’re not doing the industry any favors by simply saying Colorado is an unfavorable regulatory environment.” She pointed to a lot of advantages in the geology of the state, among them its known rock.

Curtis used her time to focus on what the industry can do to try to figure out what will actually increase share prices for its companies.

Fellow analyst **Welles Fitzpatrick** of SunTrust Robinson Humphrey agreed there’s plenty to be optimistic about when it comes to the future of shale in general. “When sentiment shifts, there is a lot of value set to come online. It looks depressing but it’s actually set up for a nice bounce back,” he said.

One company that is embracing the still-existing opportunities in Colorado’s rock is Denver-based HighPoint Resources Corp. **Paul Geiger**, COO and the opening keynote speaker, acknowledged that state regulations and ESG (environmental, safety and governance) documentation have made for longer permitting and planning. However, Geiger said HighPoint has been able to accomplish what it wants to get done and that Colorado is still viable.

There was also plenty of talk about the Rockies’ new star, the Powder River Basin. **Aaron Ketter**, vice president of the Rockies Business Unit for Devon Energy, said multiple horizons have created a diversified drilling program for the company in the Rockies. It now has 320,000 net acres in the Powder River Basin in Wyoming, where much of the competition for leaseholds has shifted given the scarcity of options in the better established Denver-Julesburg Basin in Colorado. He added that Devon’s Powder River margins reached 50%.

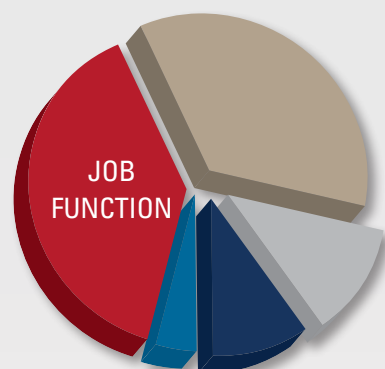

It’s no surprise then that Devon Energy is planning to double its activity levels to 15 wells in the emerging Niobrara Formation of the Powder River Basin.

Next year’s **DUG Bakken and Rockies** will be back in Denver on **March 25-26, 2021**.

You can find more features and coverage from the conference in the coming weeks on HartEnergy.com.
