DESCRIPTION

Floriculture and Greenhouse Management is designed to measure knowledge and skills related to the floriculture industry. Floral design and greenhouse operations and management is the primary focus. Students will be prepared to create floral arrangements, produce commercial plant species in a controlled environment, and manage commercial and experimental greenhouse operations.

STANDARDS, OBJECTIVES, AND INDICATORS

STANDARD 1

Divide Develop personal, leadership, and career skills through FFA participation.

Objective 1: Assess the role of FFA participation in developing personal and leadership skills.
   1. Identify important personal skills and the strategies used in developing the skills.
   2. Identify important leadership skills and the role of FFA participation in developing the skills.

Objective 2: Assess the role of FFA participation in developing career skills.
   1. List and describe proficiency awards appropriate for horticulture
   2. List and describe career development events appropriate for horticulture.
   3. Relate the importance of supervised agricultural experience to FFA achievement.
   4. Utilize FFA and supervised agricultural experience participation to gain advanced degrees of FFA membership.

STANDARD 2

Explain the maintenance and expansion of supervised agricultural experience (SAE) programs.

Objective 1: Maintain and use SAE records.
   1. Explain how SAE records are maintained from year to year.
   2. Explain how to summarize and analyze SAE records.
Objective 2: Devise long-range plans for expanding SAE programs.

1. Evaluate the overall quality of a current SAE and determine how to make it more productive or profitable.
2. Explain factors that should be considered in expanding an SAE program.
3. Explain how placement SAE and ownership SAE programs may be expanded.

STANDARD 3

**Demonstrate floral design techniques.**

Objective 1: Identify common plant materials used in floral design.

1. Identify common cut flowers used in floral design.
2. Identify common foliage used in floral design.
3. Identify common live plants used in floral design.

Objective 2: Care for fresh flowers and foliage.

1. Explain the basic care requirements of cut flowers (e.g., water, light, temperature).
2. Describe the causes of deterioration and death of flowers (e.g., ethylene gas).
3. Describe the steps of effective conditioning of flowers and foliage.
4. Explain the importance of using floral preservatives.

Objective 3: Identify floral design tools and supplies.

1. Identify common tools used in floral design.
2. Recognize and describe floral design supplies.

Objective 4: Explain the principles and elements of floral design.

1. Discuss the history and influence of different styles of design on the floriculture industry.
2. Analyze the principles of floral design.
3. Examine the concept of proportion and scale.
4. Explain how the concept of balance is applied to floral design.
5. Describe how rhythm is applied in floral work.
6. Explain how the principles of dominance and focal point are used in floral design.
7. Describe the major flower forms used in floral design.
8. Explain how space and depth enhance floral design.
9. Assess the importance of texture in floral design.
10. Evaluate the influences of color on floral work.
11. Explain basic geometric designs.
Objective 5: Design floral arrangements using the principles and elements of design using at least four of the following indicators.

1. Design corsages and boutonnieres.
2. Design bud vase arrangements.
3. Design vase arrangements.
4. Design centerpieces.
5. Design holiday arrangements.
6. Design wedding pieces.
7. Design sympathy arrangements.
8. Design color bowls and hanging baskets.
10. Prepare a potted plant with foil.
11. Create bows and/or accessories appropriate for the design.

STANDARD 4 62% of Exam Blueprint

◊ DEMONSTRATE GREENHOUSE CROP PRODUCTION TECHNIQUES.

Objective 1: Describe greenhouse structures.

1. Differentiate greenhouse designs.
2. Review considerations for greenhouse frameworks.
3. Identify and describe greenhouse glazing materials.
4. Describe the functions of the head house.
5. Describe greenhouse bench options.
6. Identify and operate supplemental lighting systems.

Objective 2: Explain greenhouse climate control.

1. Describe methods of heating greenhouse structures.
2. Contrast major greenhouse cooling and ventilation systems.
3. Discuss how energy curtains are used to maintain greenhouse temperatures.
4. Analyze greenhouse climate controls.

Objective 3: Describe automated greenhouse systems.

1. Assess automated planting systems.
2. Identify automated systems for moving plants in the greenhouse.
3. Compare automated watering systems.

Objective 4: Examine the components and properties of growing media.

1. Describe the components of growing media.
2. Describe the functions of growing media.
3. Determine desirable properties of growing media.
4. Evaluate the advantages and disadvantages of soilless media.
Objective 5: Investigate chemical characteristics of growing media.
   1. Demonstrate proper techniques for sampling growing media.
   2. Test and determine pH level of various growing media.
   3. Interpret pH test results of a growing media sample.

Objective 6: Supply nutrients to greenhouse crops.
   1. Explain plant nutrition.
   2. Describe pH and how it is modified.
   3. Describe the components of a fertilizer.
   4. Explain the methods of applying fertilizers to horticulture crops.

Objective 7: Explain the effects of light, temperature, and water on plant growth.
   1. Examine the effect of light on greenhouse crops.
   2. Describe the influence of temperature on greenhouse crops.
   3. Explain how watering practices influence greenhouse crop production.

Objective 8: Identify and explain the functions of plant growth regulators.
   1. Compare the functions of plant hormones.
   2. Examine commercial uses for plant growth regulators.

Objective 9: Propagate greenhouse crops.
   1. Compare and contrast sexual and asexual reproduction.
   2. Explain pollination, cross-pollination, and self-pollination of flowering plants.
   3. Diagram the process of plant fertilization.
   4. Describe the process of seed germination.
   5. Explain the conditions required for seed germination.
   6. Explain the importance of seed viability and vigor.
   7. Demonstrate techniques for sowing seed.
   8. Describe optimal conditions for asexual propagation.
   9. Demonstrate techniques used to propagate plants by cuttings, division, separation, and layering.
  10. Transplant greenhouse plant materials.

Objective 10: Grow greenhouse crops.
   1. Plan a growing schedule to maximize the production of the greenhouse facility.
   2. Explain the importance of proper spacing of greenhouse crops and recommended spacing practices.
   3. Select the appropriate container and medium for a greenhouse crop.
   4. Explain the purposes for pinching greenhouse crops and the techniques used.
   5. Describe disbudding procedures.
   6. Demonstrate proper watering techniques.
   7. Demonstrate production of potted flowering crops.
   8. Demonstrate production of bulb crops.
   9. Demonstrate production of bedding plants.
  10. Demonstrate production of foliage plants.
Objective 1: Discuss pest management techniques.
1. Identify categories of pests (e.g., weeds, insects, fungi, etc.).
2. Explain best management practices while maintaining environmental integrity.
3. Discuss alternative pest control techniques.
4. Demonstrate safe practices in selecting, applying, storing, and disposing chemicals.
5. Explain integrated pest management (IPM).

STANDARD 5 9% of Exam Blueprint

◊ EXPLAIN FLORICULTURE BUSINESS CONCEPTS.

Objective 1: Price floral design work.
1. Explain the importance of effective buying.
2. Determine the costs for floral arrangements.
3. Assess typical pricing strategies.
4. Calculate mark-up.

Objective 2: Prepare floriculture crops for sale.
1. Clean plants and containers.
2. Decorate plants and containers.
3. Attach price tags and care instructions.

Objective 3: Explain the basics of marketing in the floriculture industry.
1. Display floriculture materials for sale.
2. Recognize ways of maintaining and increasing the effectiveness of horticultural business displays.
3. Recognize how advertising is used.
4. Complete sales tickets.
5. Use proper telephone techniques.
6. Describe effective packaging and delivery.
7. Describe the impact of the international flower market on the floriculture industry.

Objective 4: Describe floriculture business management.
1. Differentiate the types of floriculture businesses.
2. Recognize costs related to floriculture production.
3. Analyze the importance of marketing, promotion, and sales.
4. Describe career opportunities associated with floriculture management.

STANDARD 6 1% of Exam Blueprint

◊ EXPLAIN GREENHOUSE BUSINESS CONCEPTS.

Objective 1: Prepare greenhouse crops for sale.
1. Clean plants and containers.
2. Decorate plants and containers.
3. Calculate mark-up.
4. Attach price tags and care instructions.
Objective 2: Explain the basics of marketing in the greenhouse industry.

1. Recognize ways of maintaining and increasing the effectiveness of horticultural business displays.
2. Recognize how advertising is used.
3. Complete sales tickets.
4. Use proper telephone techniques.

Objective 3: Describe greenhouse business management.

1. Differentiate the types of greenhouse businesses.
2. Recognize costs related to production.
3. Describe career opportunities associated with greenhouse management.
Performance Standard Evaluation Checklist

Student Name

Instructor’s Name

School __________________________  District __________________________

Performance Rating Scale:

1 2 3 4 5 6 7 8 9 10

Limited Skills..........................Moderate Skills..............................High Skills

Performance assessments may be completed and evaluated at any time during the course. The following performance skills are to be used in connection with the associated written exam. To pass the performance standard the student must attain a performance standard average of 8 or higher on the rating scale. Students may be encouraged to repeat the objectives until they average 8 or higher for the following elements:

<table>
<thead>
<tr>
<th>PERFORMANCE SKILLS STANDARDS</th>

<tbody>
<tr>
<td>STANDARD 1 – Attend an FFA meeting.</td>
<td></td>
</tr>
<tr>
<td>STANDARD 2 – Develop short and long range leadership and personal development goals.</td>
<td></td>
</tr>
<tr>
<td>STANDARD 3 – Use the approved record book to record financial transactions and activities on a Supervised Agricultural Experience Program.</td>
<td></td>
</tr>
<tr>
<td>STANDARD 4 – Design and make corsages and boutonnieres.</td>
<td></td>
</tr>
</tbody>
</table>
## PERFORMANCE SKILLS STANDARDS

**STANDARD 5** – Design and make four of the following floral arrangements using the principles and elements of design:

- Bud Vase
- Center piece
- Holiday arrangement
- Hanging basket
- Wedding arrangement
- Color bowl
- Sympathy arrangement

**Score:**

**STANDARD 6** – Propagate plants using both seed and cuttings.

**Score:**

**STANDARD 7** – Perform typical plant maintenance including:

- Transplanting
- Watering
- Disbudding
- Pinching

**Score:**

**STANDARD 8** – Develop a growing schedule to maximize the production of a greenhouse facility.

**Score:**

**STANDARD 9** – Prepare greenhouse plants for sale.

**Score:**

## PERFORMANCE STANDARD AVERAGE

**Average:**
