

## EXAM INFORMATION

---

**Items**

73

**Points**

78

**Prerequisites**

BIOLOGY

**Grade Level**

11-12

**Course Length**

ONE YEAR

**Career Cluster**

HEALTH SCIENCE

LAW, PUBLIC SAFETY, CORRECTIONS  
AND SECURITYSCIENCE, TECHNOLOGY, ENGINEERING  
AND MATHEMATICS

NCHSE HEALTH SCIENCE BUNDLE

**Performance Standards**

INCLUDED

**Certificate Available**

YES

## DESCRIPTION

---

This year-long course is designed to measure students' awareness of the branch of health science related to medical forensics. This course focuses on introductory skills and assessment in order to develop the ability to identify, analyze, and process logically using deductive reasoning and problem solving. Medical forensics involves many aspects of health science instruction, including laboratory skills and safety, microscopy, toxicology, measurement, physical evidence identification, pathology, anthropology, entomology, psychology, blood spatter analysis, and career exploration.

## EXAM BLUEPRINT

---

**STANDARD****PERCENTAGE OF EXAM**

1- Fundamentals	3%
2- Laboratory Skills	3%
3- Medical Forensics Investigation	5%
4- Trace Evidence	9%
5- Fingerprint Identification	17%
6- Serology	17%
7- Mortality	14%
8- Forensic Psychology	8%
9- Forensic Anthropology	10%
10- Toxicology	6%
11- DNA Evidence	8%

## STANDARD I

### STUDENTS WILL EXPLORE THE FUNDAMENTAL ASPECTS OF MEDICAL FORENSICS

Objective 1 Detail the history and development of medical forensics.

1. Create a historical timeline.
2. Explore a variety of careers associated with medical forensics professions.
  1. Crime laboratory analyst
  2. Clinical laboratory technician
  3. Microbiologist
  4. Fingerprint analyst
  5. Criminalist
  6. Crime scene photographer
  7. Phlebotomist
  8. Forensic serology DNA criminalist
  9. Serology technician
  10. Forensic psychologist
  11. Mental health counselor
  12. Toxicologist
  13. Biochemist
  14. Pharmacologist
  15. Geneticist
  16. Medical examiner

Objective 2 Discuss the organization of the crime laboratory and detail the functions it serves.

1. Discuss the federal programs established in the United States to investigate crimes.
  1. ATF
  2. FBI
  3. Post Office
  4. DEA
2. Describe the organization of the Crime Lab.
3. Compare and contrast the Crime Lab with a crime lab from another state and an international crime lab.

Objective 3 Describe the importance of physical evidence and observation.

1. List the types of evidence (eyewitness, class evidence, physical evidence-trace, circumstantial, individual, class).
2. Discuss how evidence is used to convince a jury of guilt.
3. Review and practice the steps of becoming an accurate observer.
  1. Observe systematically
  2. Turn off filters
  3. Interpret information later
  4. Documentation
    1. Written
    2. Photographs

## STANDARD 2

STUDENTS WILL EXPLORE ESSENTIAL LABORATORY SAFETY SKILLS AND FUNDAMENTAL SKILLS RELATED TO MICROSCOPY AND MEASUREMENT

- Objective 1** Demonstrate appropriate use of personal protective devices.
1. Describe how personal protective devices protect the evidence and the lab worker.
  2. Demonstrate how to use personal protective devices properly (e.g., lab coats, gloves, safety glasses).
  3. Demonstrate safe removal of gloves.
- Objective 2** Exhibit appropriate behavior in the lab.
1. Explain the dangers of evidence contamination through food, drink, cosmetics, lotion, eye drops, and contact lenses.
  2. Follow proper disposal and clean-up procedures with respect to chemicals and laboratory equipment.
  3. Demonstrate proper hand washing technique.
- Objective 3** Use laboratory equipment correctly and safely.
1. Demonstrate the proper use of equipment (micropipette, centrifuge, spectrophotometer, electrophoresis apparatus—DNA, thermocycler, microscope, balance, water baths, Vernier calipers, glassware [metric units], rulers, and measuring tapes).
  2. Demonstrate proper use, handling, and components of a compound microscope and a stereoscope.
    1. Demonstrate the ability to create a wet mount slide.
- Objective 4** Follow laboratory procedures.
1. Understand the purpose of individual steps within a protocol.
  2. Perform the steps of laboratory protocols accurately and in sequence.
- Objective 5** Comply with policies and requirements for maintaining a lab manual.
1. Follow standard operating procedures for maintaining a lab manual.
  2. Document laboratory work following the steps of the scientific method (objectives, material, procedures, data/results, and conclusion).
- Objective 6** Demonstrate proper handling of chemicals.
1. Communicate the rationale for laboratory labeling procedures.
  2. Recognize and comply with the labeling of chemicals used in a laboratory setting for safe handling and storage (flammability, corrosiveness, biohazards, toxicity, etc.).
  3. Reference and interpret the guidelines in Safety Data Sheets (SDS).

Standard 2 Performance Evaluation included below (Optional)

## STANDARD 3

STUDENTS WILL DESCRIBE TECHNIQUES USED TO PROCESS A HOMICIDE CRIME SCENE AND PRESERVE THE EVIDENTIARY VALUE OF THE SCENE

- Objective 1** Describe how various medical forensics professionals process a crime scene.
1. Responding officer

2. Crime Scene Investigator
3. Crime Scene Photographer
4. Medical examiner

Objective 2 Demonstrate or describe proper procedures of evidence collection.

1. Trace (demonstrate)
2. Biological (describe)
3. Drugs, Plants, and Drug Paraphernalia (describe)
4. Weapons (describe)
5. Fingerprint (demonstrate)

Objective 3 Identify how a crime scene and evidence may be compromised.

1. Contamination (family, law enforcement, crime scene workers, etc.)
2. Chain of custody (evidence lost, etc.)
3. Environmental conditions (temperature, moisture, etc.)
4. Preservation of the scene (value of evidence, etc.)
5. Processing at the lab

## STANDARD 4

STUDENTS WILL IDENTIFY AND ANALYZE TRACE EVIDENCE, EMPHASIZING HAIR AND FIBER

Objective 1 Examine trace evidence using a microscope, chromatography, and other techniques.

1. Define and list examples of trace evidence
2. Collect and analyze various types of trace evidence (dust, pollen, fiberglass, etc.)
3. Define and identify a variety of microbes
4. Use a compound microscope to identify microbes.

Objective 2 Examine and analyze the forensic aspects of hair.

1. Describe the microscopic structure of hair
  1. Shaft
    1. Cortex
    2. Cuticle
    3. Medulla
  2. Root
  3. Follicle
2. Describe the location of nuclear and mitochondrial DNA associate with hair.
  1. Shaft
  2. Root
3. Describe the hair growth cycle and how it relates to trace evidence
  1. Anagen, catagen, telogen
  2. Chemical absorption

Objective 3 Examine and analyze the forensic aspects of fibers by using physical (microscopic) and chemical (burn, acid, base, acetone) testing methods.

1. Natural fibers
  1. Wool
  2. Silk
  3. Cotton
  4. Cashmere
  5. Etc.

2. Synthetic
  1. Polyester
  2. Spandex
  3. Acrylic
  4. Nylon
  5. Etc.

## STANDARD 5

### STUDENTS WILL EXPLORE FINGERPRINT IDENTIFICATION

**Objective 1** Describe fingerprint classification.

1. Describe the three fundamental principles of fingerprinting
  1. First degree
  2. Second degree
  3. Third degree
2. Identify the degrees of fingerprinting
  1. First degree
  2. Second degree
    1. Bifurcation
    2. Ridge ending
    3. Short ridge
    4. Island/Dot
    5. Double bifurcation
    6. Crossover
    7. Enclosure
  3. Third degree

**Objective 2** Identify and classify fingerprint and ridge patterns.

1. Identify and classify fingerprint and ridge patterns.
  1. Classify fingerprints into three basic patterns
    1. Loops
      1. Right
      2. Left
    2. Whorls
      1. Double
      2. Plain
      3. Central
      4. Accidental
    3. Arches
      1. Tented
      2. Plain
  2. Identify individualization of fingerprints
    1. Ridge characteristics
    2. Ridge count
  3. Describe the IAFIS System of fingerprint identification.

**Objective 3** Compare and contrast latent, plastic, and visible fingerprints.

1. Develop latent fingerprints using dusting, staining, and chemical fuming.
2. Develop a plastic fingerprint using a mold (wax, soap, putty, etc.).

3. Create and document visible fingerprints using digital photography.

Standard 5 Performance Evaluation included below (Optional)

## STANDARD 6

### STUDENTS WILL INVESTIGATE THE CHARACTERISTICS OF BLOOD, BLOOD TESTING, AND BLOODSTAIN ANALYSIS

Objective 1 Identify the components and chemical properties of blood.

1. List the components of blood.
  1. Plasma
  2. Erythrocytes
  3. Leukocytes
  4. Thrombocytes
2. Identify the antigens and antibodies that determine ABO blood types and the Rh factor.

Objective 2 Determine genetic probabilities using blood types.

1. Use a Punnett Square to determine blood type probabilities.
2. Apply the use of a Punnett Square to solve paternity questions.

Objective 3 Examine and analyze blood spatter.

1. Illustrate size, shape, and directionality of blood spatter in a laboratory experiment.
2. Compare and contrast low, medium, and high velocity blood spatter.
3. Examine different types of blood spatter patterns
  1. Drip
  2. Castoff
  3. Transfer
  4. Swipe
  5. Wipe
  6. Arterial
  7. Expirated
  8. Misting
  9. Void

Objective 4 Describe proper procedures for bloodstain evidence collection, presumptive testing (Kastle-Meyer), and preservation.

1. Describe how to collect a wet stain and a dry stain.
2. Demonstrate how to collect a large object in reference to blood evidence collection (i.e., sheets, blankets, clothing, etc.).
3. Using residual blood from a mammal, perform and explain a presumptive blood test
  1. i.e., Absorption pads from ground beef

Standard 6 Performance Evaluation included below (Optional)

## STANDARD 7

### STUDENTS WILL INVESTIGATE VARIOUS ASPECTS OF DEATH

**Objective 1** Describe correct anatomical position and the role it plays in death investigation.

1. Describe anatomical position.
2. Apply directional terms related to autopsy
  1. Superior
  2. Inferior
  3. Anterior
  4. Posterior
  5. Dorsal
  6. Ventral
  7. Medial
  8. Lateral
  9. Proximal
  10. Distal
  11. Deep
  12. Superficial
  13. Supine
  14. Prone

**Objective 2** Locate the body cavities, quadrants, and body regions and identify the major organs within each.

1. Dorsal cavity
  1. Cranial
  2. Spina
2. Ventral cavity
  1. Thoracic
  2. Abdominal
  3. Pelvic
3. Body regions
  1. Right Hypochondriac
  2. Left hypochondriac
  3. Epigastric
  4. Right lumbar
  5. Left lumbar
  6. Umbilical
  7. Right inguinal
  8. Left inguinal
  9. Hypogastric

**Objective 3** Identify the following organs and their location

1. Lungs
2. Heart
3. Diaphragm
4. Esophagus
5. Trachea
6. Stomach
7. Spleen

8. Pancreas
9. Liver
10. Gallbladder
11. Small intestine
12. Large intestine
13. Kidney
14. Bladder

**Objective 4** Compare and contrast the manner and method of death.

1. Define and list manners of death.
2. Define and list methods/causes of death.
3. Define and list mechanisms of death.

**Objective 5** Identify the steps of an autopsy procedure and discuss the role an autopsy report may play in a death investigation.

1. List the steps of an external examination.
2. Describe the proper technique to perform a Y-shaped incision.
3. List the steps of an internal examination.

**Objective 6** Identify the stages of decomposition to determine approximate time of death.

1. Define taphonomy and describe the stages of decomposition
  1. Fresh
  2. Putrefaction
  3. Black putrefaction
  4. Butyric
  5. Dry
2. Compare and contrast:
  1. Algor mortis
  2. Rigor mortis
  3. Livor mortis
3. Identify common insects associated with decomposition (i.e., blow fly, carrion beetle, etc.) and diagram their life cycles.
  1. Egg
  2. Larva
  3. Pupa
  4. Adult
4. Identify various environmental factors related to time of death (temperature, humidity, cause of death, etc.).

Standard 7 Performance Evaluation included below (Optional)

## **STANDARD 8**

STUDENTS WILL EXPLORE ASPECTS OF THE CRIMINAL MIND

**Objective 1** Locate and identify the major organs of the nervous system.

1. Brain
  1. Cerebral cortex
  2. Cerebellum
2. Spinal cord

Objective 2 Identify and describe offender-profiling procedures.

1. Profiling input
2. Decision process models
3. Crime assessment
4. Criminal profile
5. Investigation
6. Apprehension

Objective 3 Identify psychological testing processes and procedures used to study the criminal mind.

1. Describe the tests used to determine the cognitive and personality types of offenders.
2. Discuss the problems with psychometric tests.
3. Describe brain abnormalities, genetics, and environmental factors related to the criminal mind.
4. Describe the physiological functions measured by a polygraph machine
5. Interpret data collected from a polygraph

Objective 4 Identify Compare and contrast neurobiological brain abnormalities and mental conditions related to abnormal psychology and the criminal brain and technical instrumentation used to diagnose these abnormalities.

1. Describe brain abnormalities, genetics, and environmental factors related to the criminal mind.

Objective 5 Explore the psychological aspects of a serial killer and mass murderers.

1. Define serial killer.
2. Define mass murder.
3. Explore the motives of serial killers.
4. Compare and contrast the types of serial killers.
5. Explore the motives of a mass murderer.

## STANDARD 9

STUDENTS WILL EXPLORE CHARACTERISTICS OF PHYSICAL EVIDENCE AND REMAINS

Objective 1 Identify the basic bones of the skeleton and distinguish the differences between the long and short bones.

1. Cranium
2. Vertebrae
3. Sternum
4. Xiphoid process
5. Ribs
6. Hyoid
7. Humerus
8. Radius
9. Ulna
10. Carpals
11. Metacarpals
12. Phalanges
13. Pelvis
14. Femur
15. Patella
16. Tibia

17. Fibula
18. Tarsals
19. Metatarsals
20. Phalanges

- Objective 2** Use skeletal remains to determine the physical characteristics of an individual.
1. Determine the sex of an individual based on skull, jaw, brow ridge, pelvis, and femur.
  2. Determine the ancestry of an individual.
  3. Estimate the age of an individual.
  4. Estimate the height, build, and handedness of an individual.

- Objective 3** Identify injuries, bone diseases, and possible causes of death using bone characteristics.
1. Compare and contrast pre and postmortem bone injuries (i.e., fractures).
  2. Identify bone patterns indicating disease (i.e., arthritis).
  3. Identify bone markings that could indicate cause of death (stab wound, bullet hole, blunt force trauma, etc.).

- Objective 4** Describe how teeth are used in forensic identification.
1. Name and number deciduous (baby) and permanent teeth.
  2. Employ dentition patterns as a means for bite mark identification.
  3. Describe the use of forensic dentistry in regard to mass disasters and body identification.

Standard 9 Performance Evaluation included below (Optional)

## STANDARD 10

STUDENTS WILL DEVELOP AN UNDERSTANDING OF THE ADVERSE EFFECTS OF DRUGS AND BE ACQUAINTED WITH THE LABORATORY INVESTIGATION OF THE MOST COMMON POISONINGS

- Objective 1** Identify the five schedules of drug types and classify according to the effects that they have on the body.
1. Describe the five schedules of drug types
  2. Schedules 1-5
  3. Classify the Categories of drugs based on the physiological effects on the body and the chemical composition
  4. Stimulants (i.e. Amphetamines, Cocaine, Crack, Methamphetamines, Adderall, other mental disorder medications)
  5. Depressants (i.e. Alcohol, Sedatives, Xanax, Marijuana, All narcotics, Other mental disorder medication)
  6. Narcotics/Opioids (i.e. Heroin, Codeine, Methadone, Oxycodone)
  7. Hallucinogens (i.e. Ecstasy (MDMA), Bath salts, Mushrooms, GHB, Other “date rape” drugs)

- Objective 2** Describe how individual body systems are affected by drug intake
1. Integumentary
  2. Skeletal
  3. Muscular
  4. Nervous
  5. Cardiovascular
  6. Respiratory
  7. Endocrine
  8. Digestive

- 9. Urinary
- 10. Reproductive

Objective 3 Identify signs and symptoms of an overdose.

- 1. Stimulants
- 2. Depressants
- 3. Narcotics/Opioids
- 4. Hallucinogens

Objective 4 Describe current field and laboratory procedures used for measuring the concentration of alcohol in the bloodstream.

- 1. Describe techniques used to measure the blood alcohol content (BAC)
  - 1. Through blood
  - 2. Through the breath
- 2. Anabolic steroids
- 3. Depressants (including alcohol)
- 4. Bacterial toxins
  - 1. Botulism
  - 2. Tetanus
- 5. Heavy metals and pesticides
  - 1. Lead
  - 2. Mercury
  - 3. Arsenic
  - 4. Cyanide
  - 5. Strychnine

Objective 5 Discuss other chemical and biological agents that have high mortality rates with exposure.

- 1. Bacterial toxins
  - 1. Botulism (clostridium botulinum)
  - 2. Tetanus (clostridium tetani) lockjaw
- 2. Bioterrorism
  - 1. Ricin (castor beans)
  - 2. Anthrax (Bacillus anthracis)

Objective 6 Compare and contrast methods used to collect and package drug evidence.

- 1. Identify procedures used to collect and package plant substances
- 2. Identify procedures used to collect and package liquids
- 3. Identify procedures used to collect and package biohazards

## STANDARD 11

### STUDENTS WILL INVESTIGATE THE IMPORTANCE OF DNA EVIDENCE

Objective 1 Identify the structure and function of a DNA molecule.

- 1. Describe the structure of DNA.
- 2. Describe the function of DNA.
- 3. Compare and contrast nuclear DNA and mitochondrial DNA.

Objective 2 Describe advancements in technology used to obtain a DNA fingerprint.

- 1. Discuss the purpose of PCR.
- 2. Define RFLP and discuss how it relates to forensic identification.
- 3. Define STR and discuss how it relates to forensic identification.

4. Describe the CODIS System of DNA identification
5. Processing at the lab

Standard II Performance Evaluation included below (Optional)

### Medical Forensics Performance Standards (Optional)

Performance assessments may be completed and evaluated at any time during the course. The following performance skills are to be used in connection with the associated standards and exam. To pass the performance standard the student must attain a performance standard average of **8 or higher** on the rating scale. Students may be encouraged to repeat the objectives until they average **8 or higher**.

Students Name \_\_\_\_\_

Class \_\_\_\_\_

#### PERFORMANCE RATING SCALE

#### STANDARD 2 Laboratory Skills

Score:

- Demonstrate appropriate use of personal protective devices.
- Demonstrate proper use and handling of micropipettes.
- Competently focus a compound microscope.
- Prepare a wet mount slide.
- Maintain an accurate lab manual.

#### STANDARD 5 Fingerprint Identification

Score:

- Develop a latent fingerprint and identify 10 ridge characteristics.

#### STANDARD 6 Serology

Score:

- Classify blood spatter by velocity (high, medium, and low).

#### STANDARD 7 Mortality

Score:

- Identify the steps of an autopsy procedure by animal dissection.
- Estimate time of death based on decomposition.

#### STANDARD 9 Forensic Anthropology

Score:

- Identify the sex and approximate height of an individual using their skeletal remains.
- Match a bite mark from a victim to the perpetrator.

#### STANDARD 11 DNA Evidence

Score:

- Collect and properly label evidence.

#### PERFORMANCE STANDARD AVERAGE SCORE:
