Performance Notes

1. The score is transposed.
2. The oboes, bass clarinet, bassoon, and horns are desired but optional, and are either adequately doubled or cued in other parts.

Though there are only two horn parts, it is preferred that each part is doubled.

3. The opening bassoon passage is very difficult unless an alternate fingering is used. This fingering is achieved simply by playing the D as usual; to play the E \flat , have the whisper key lock “on” and then add the C \sharp key to the D fingering. This allows easy movement between D and E \flat . The player should then take off the key lock at measure 40. (These instructions are also included in the part.)

4. For the passage of the piece beginning at measure 175, it is preferred that the featured drums be in the four corners of the hall in order to surround the audience. This means that the percussion 1 toms (also used earlier in the piece) be placed as close to the front of the stage as possible. Assuming this is to stage right (i.e., to the conductor’s left), percussion 3 should move (around m. 164) to two large drums stage left (to conductor’s right) – as close to the front of the stage as possible.

Hall Percussion Right is to the conductor’s right but in the rear of the hall. Hall Percussion Left is to the conductor’s left but in the rear of the hall. (If necessary, an alternative would be to have the four percussionists lined up across the rear of the stage.)

This passage is written to allow for the inevitable time/sound delay between the front and rear of the hall. The players should watch the conductor (rather than listen) as much as possible, but there is little in the section that requires absolute synchronicity.
