A Winter Morning

By Randall D. Standridge

Program Notes

In the winter of 2025, I had the chance to conduct an honor band up in Oswego, New York. Now, being from Arkansas—where even an inch of snow sends folks scrambling for milk and bread—I was completely enchanted by what I saw. The whole countryside was blanketed in rolling white hills, with trees bowed under the weight of fresh snow. It was like stepping into a postcard.

One morning, driving to rehearsal, I couldn't help but marvel at the quiet beauty all around me. The sunlight hit the snow just right, and the whole world sparkled like something out of a fairy tale. In that short drive, this piece practically wrote itself in my head. That evening, back at the hotel, I sat down and poured it onto paper in about two hours—trying to capture that same childlike wonder I'd felt looking out across the winter landscape.

A Winter Morning is meant to evoke the crisp, joyful energy of a snowy day. The melodies are bright and playful, and the harmonies shift quickly—a little nod to Vivaldi's *Winter*. The quick 3/4 meter keeps things moving with a sense of excitement, like kids tumbling outside at the first sign of snowfall. It should feel just as at home in a winter concert as it would on a festival stage.

I hope you, your students, and your audience enjoy playing this piece as much as I enjoyed writing it. And the next time you find yourself in a winter wonderland, take a breath, look around, and soak in the beauty of our world.

Rehearsal suggestions

- The tempo of this work is critical to its character. When planning your preparation, make sure to allow time for proper technical development to achieve the written tempos, lest the work come off as "boring."
- Dynamics should be noticeable and taken to extremes.
- Percussion should be on the higher end of dynamic balance. Do not hide them.
- This piece makes use of several repeats. For younger performers, I always find it helpful to have them physically touch their page to follow the "map" of the piece.
- If the students have trouble with the faster tempo, you might try this: After they have mastered the piece at a slower tempo, have them fake/air play along with the recording several times, then take small segments at the suggested tempo. If they internalize a slower tempo, this is a good trick to move them to the new one.
