Ride of the Red Knights

By Randall D. Standridge

Program Notes

I have always loved fantasy.

As a kid, I was obsessed with anything involving dragons, magic, epic quests, and mysterious kingdoms. That love never left me—and as a composer, I've found great joy in creating my own fictional realm to explore through music: The Darklands.

Ride of the Red Knights is the latest chapter in my ongoing Tales from the Darklands series, which also includes The Dragon Lord, The Lake of Sorrows, Blackthorn March, and The Troll King. Each piece explores a new character or region from this shadowy, enchanted world, and with this work, I wanted to introduce you to one of its most fearsome forces: The Red Knights.

The Legend of the Red Knights

The Red Knights are the elite soldiers of Lady Blackthorn, ruler of the outer realms of the Darklands. Bound by loyalty and magic, these ghostly warriors patrol the borders of her shadowy realm, protecting it from the armies of Queen Oscura and the encroaching darkness beyond.

In life, they swore eternal allegiance. In death, they returned—again and again—to serve their queen, so long as she holds the Ruby of Souls, the gem that binds them to her will. Cloaked in crimson armor, eyes glowing with spectral fire, they ride at night under a blood moon, their footsteps echoing through the misty woods and forgotten roads of the Darklands.

When the Ruby glows... the Red Knights ride.

The piece begins with a slow, majestic opening, symbolizing the knights' resurrection and silent oath renewed. Then, the music shifts into a relentless, driving march—minor mode, heavy percussion, and melodies shared throughout the ensemble—meant to evoke their unyielding pursuit across the shadowed landscape.

Whether used for concert, festival, or a perfectly spooky Halloween performance, **Ride of the Red Knights** is meant to let your band channel their inner adventurers and bring a bit of fantasy to the stage.

So mount up. The horn has sounded.

The Red Knights ride again.

Rehearsal suggestions

-The tempo of this work is critical to its character. When planning your preparation, make sure to allow time for proper technical development to achieve the written tempos, lest the work come off as "boring."

-Dynamics should be noticeable and taken to extremes.

-Percussion should be on the higher end of dynamic balance. Do not hide them.

-If the students have trouble with the faster tempo, you might try this: After they have mastered the piece at a slower tempo, have them fake/air play along with the recording several times, then take small segments at the suggested tempo. If they internalize a slower tempo, this is a good trick to move them to the new one.
