## Program Notes

When one thinks of events from his or her own past, especially if these were happy ones, it is a way of transporting oneself back in time, and a time circle is created even if only for a brief moment. Time circles are often triggered by looking at old photographs or by watching old videos, but music also has that power. A popular song or perhaps a piece of piano music can be the key to unlock powerful memories from a person's past and create, for a short time, a circle in time. In the initial stages of writing *Time Circles*, the composer remembered a tune he had written for piano many years previously. It became a significant part of the new composition, and the idea of circular motion then began to permeate the piece in several other ways.

## About the Composer

John Prescott is a Professor of Music at Missouri State University, where he teaches theory, composition, and commercial music. His compositions include works for band, orchestra, chorus, solo, and chamber ensembles, as well as multi-media pieces, and have been performed nationally and internationally. Dr. Prescott holds degrees in music theory and composition from Florida State University and from the University of Kansas, where he studied composition with John Pozdro and James Barnes.
