Pesticide Analysis

Date of Analysis: 04-May-17

As a guideline for pesticide screening, Anandia Labs uses the Oregon White Paper entitled "Technical Report: Oregon Health Authority's Process to Determine Which Types of Contaminants to Test for in Cannabis Products, and Levels for Action". Anandia's pesticide screen is performed using (LC-MS/MS) and can screen down to below single digit ppb concentrations for most pesticides. Currently we analyze for 51 pesticides, fungicides and PGRs. No detection of Myclobutanil at less than 10 ppb in dried herbal cannabis. [Anandia Method: AL-407 v1]
