Performance Friction One Piece Disc and Carbon Metallic® Pads with Dynamic Disc Symmetry

Performance Friction delivers the Lowest Cost per Mile with Improved fuel mileage and Extended service life resulting in a 10% total Brake Cost Reduction.

Performance Friction Rotors are made with the same materials and processes as our championship winning race rotors giving you reliable performance even under severe conditions.

Performance Friction Rotors have two (2) times the life of any other rotor tested, Lowest Disc Coning and Lowest Disc Runout—less than .0005 inches—for reduced pulsation and vibration.

Performance Friction Carbon Metallic pads have more stopping power with improved ABS response and firmer pedal and are mad with encironmetaly friendly friction material.

Carbon Metallic pads outperformed ceramic and semi-metallic pads in both noise and pad wear testing—lasting up to 4 times longer than ceramic and semi-met pads.
