

# Configure Piazza within Desire2Learn

You will need three pieces of information from Piazza to complete the setup. These are:

- Consumer Key: piazza.sandbox
- Shared Secret: test\_only\_secret
- Launch URL (must be https): <https://piazza.com/connect>

You should email [integrations@piazza.com](mailto:integrations@piazza.com) to receive a key and secret for your school when you're ready to use the integration for real classes. **The key above is for testing purposes only and has limited functionality.** Please contact us if you have any issues with the following instructions, or if have questions about using Piazza with D2L.

To get set up, please follow the simple instructions in this D2L Recipe:
