However, case studies should not be added without reporting the importance of the part, which can lead to negative labels. Here are some tips to help you in the Write section: Structure is the key to a write response. A really well structured response appeals to the examiner and guarantees that the reader has a logical flow. Practice writing answers on a regular basis and try mock tests to help you write answers on D-day without many problems. It will be the first step in getting a good score. It is better to show objective and balanced opinions in your own responses. Focusing on one perspective can make your writing boring and biased. In addition, providing valid and powerful reasoning justifies the reasoning. The goal is to write accurate answers within the specified word limits. Time limits during exams can be resolved through the practice of writing answers because there is not enough time to understand and write.
