Gold Hardware Award - MMORPG.com The entire surface of the arena table is covered with a replaceable microfiber mousepad on top of a hard MDF card. The Mousepad is specially designed to fit the curved 14 sq ft (1.31 sq. meter) Arena table with a non-slip rubber substrate to keep it in place. The full-surface mousepad is also water resistant, easy and simple cleaning. If you want to do a more thorough cleaning, you should not throw your machine into the wash later at low temperature and air dry. The arena has 3 cuts on top of the road surface of a mesh basket organized against the table top bottom for tight cable management. This system is easier to manage, out of the way, and it looks great. The 3 cuts are not only for cable management, but also for monitoring. The 5'3 (160cm) wide table is wide enough to display 3 oversized monitors. The arena is held with sturdy steel legs with an adjustable height of up to 10cm (3.9inch). Use the allen key to correct the legs and add extra stability. There are also 4 balance adjustment tops under the legs to prevent the table from shaking so that they can adapt to your personal environment. Are you having trouble getting your desk together?
