

The next generation of vSim® for Nursing

A TRUSTED PROGRAM OPTIMIZED TO TURN ACADEMIC LEARNING INTO CLINICAL SUCCESS

The virtual simulation program that so many rely on to educate their nursing students has been taken to the next level to ensure students get the most comprehensive and true-to-life clinical training.

Explore the **NEW features** that make vSim® for Nursing an immersive experience like no other

Increased medical fidelity

With enhanced 3D patient graphics that increase medical fidelity in the patients and within the simulator experience, students can recognize cues and react to unfolding visual and audio responses from the patient. As part of the virtual experience, students will see an immediate, lifelike, and accurate effect from providing patient-centered care.

Improved communication

Students will learn about receiving and giving an SBAR (Situation Background Assessment Recommendation) during a patient handover, teaching them to communicate effectively with their colleagues and improving the quality of their patient handovers.

Instructors will receive instant assessments at the end of a scenario to provide them with even deeper insight into student performance.

Enhanced clinical judgment

New features and updates in vSim® for Nursing help students develop clinical judgment and apply their learning, building their confidence and competence and preparing them for the next generation NCLEX®, as well as for practice.

vSim® for Nursing is personalized for the student, recording the actions in the scenario and providing students with a unique feedback log and remediation resources to identify strengths or needed improvement.

vSim[®] for Nursing, a leader in the industry, now has more to love

Seamless user experience

Updates to the platform make **vSim[®] for Nursing** easier to navigate across multiple operating systems and devices. Now fully supported for tablet devices, as well as mobile, students and instructors can get the powerful full simulation learning experience of **vSim[®] for Nursing** anytime and anywhere.

With a streamlined user experience including tool tips and search, instructors and students can easily engage with **vSim[®] for Nursing** to get to the heart of patient-centered care quickly!

Give next-generation nurses the true-to-life experiences they need

The most trusted leaders in nursing education, Laerdal Medical, Wolters Kluwer, and the NLN, have joined forces to develop the most advanced, convincingly lifelike simulations across a wide range of practice areas.

Optimize your students' virtual clinical learning and prepare them for practice with the next generation of **vSim[®] for Nursing**.
