Navy electronic worksheet how to

Sailors aboard the flagship of the U.S. 7th Fleet USS Blue Ridge (LCC-19) in the Japanese city of Yokosuka in September 2018 take part in the entire naval examination of the E-6. U.S. Navy photo About a third of the sailors operating the service will be part of a pilot testing program for the new Navy system designed to reduce paperwork and errors related to enrolled promotion worksheets (EAW). Beginning this month, the Navy will replace paper versions of EAW with an electronic automated process that will become part of the Standard Integrated Personnel System (NSIPS). The new electronic versions of the EAWs will include factors advancing the law for all Petty Officers (E-4 via E-6) candidates and senior officers trying to become Chief Petty Officers (E-7), according to a recently updated policy. During the upcoming spring promotion cycle, some 100,000 military personnel will be eligible for the senior and superior exams. According to the Navy, as of December 17, 270,666 sailors were called up to the navy. The new electronic sheet and automated process are part of a larger process to modernize the personnel system, according to a February written statement provided by Deputy Chief of Naval Staff Admiral Robert Burke to the Senate Subcommittee on Personnel. Education officers (ESO) for each team are required to submit a completed EAW to each sailor planning to participate in naval promotion exams, which are part of the senior officer's promotion process and review process as Chief Petty Officer. The sheets include sailor advancing right factors and point values for items of the final few scores, which assigns points to performance mark averages (PMA) - recommendations to promote the team - and other earned rewards and praise, according to the fact sheet of the Navy. Changing from paper to electronic promotion sheets will not only make it easier for sailors and ESOs, but it will help eliminate many of the common mistakes that have traditionally hindered the progress cycle. It's a significant modernization effort that will certainly be a value-added improvement for the Navy. Capt. Kertreck Brooks, commander of the Naval Education and Training Center for Professional Development, said in a September draft update on upcoming changes. The automated process is designed to generate sheets populated by data for sailors eligible for time; Route sheets to authorized staff for review, updates, signatures; send sheets to the Navy's Enlisted Promotion System (NEAS), which calculates each sailor's right Final Multiple Score (FMS). Pilot tests the connection to the web for commands and the ability of sailors to access electronic versions of their sheets. Once fully Electronic forms will automatically fill out the PMA sailor's exam and reward scores, according to the new guidance. Below is the release of the

Navy detailing the new electronic recruited Promotion sheet. PENSACOLA, Fla. (NNS) - Paper versions of the Navy's Enlisted Promotion Sheet (EAW) will soon be a relic of the past as printed copy sheets transition to an electronic automated process, becoming part of the Navy's Standard Integrated Personnel System (NSIPS). Detailed in NAVADMIN 316/18, released on December 27, the EAW transition will use authoritative data to display promotional factors for all E-4s through E-7 candidates. This new sailor 2025 pay and personnel system upgrade effort gives sailors better control over their EAW and provides teams with a more efficient way of verifying navy-enlisted promotion system (NEAS) requirements, said Master Chief Human Resources Officer Anton Fitz, an enlisted promotion planner for the Office of the Chief of Naval Operations (N132). Sailors will be able to view their EAW months before the exam, providing extra time for correction if necessary. The EAW update will begin with a pilot program from January to March 2019, including the Reserve 104 promotion cycle and the Active Duty 243 promotion cycle. The pilot will review the command sheet verification processes using the new online features and ensure that connectivity processes and manual processes support EAW requirements. At the EAW pilot stage, the electronic form in NSIPS can be printed and used for manual sheet process, said Naval Education and Training Center For Professional Development (NETPDC) team chief Gregory Pritchard. Initially, no data will be transferred from EAW to NEAS and no discrepancies will be corrected - we are primarily looking for feedback and will gradually integrate changes and full EAW functionality for subsequent cycles. NSIPS teams are expected to set up their EAW command hierarchy by January 15 in preparation for the full use of the fleet scheduled for June 2019. Training modules for the new EAW are available on the NSIPS homepage, under the training section. The tutorials include topics related to user roles and detailed procedures for different EAW tasks. Sailors will be able to access their EAW and post-exam administrative comments through the MyNavy Portal (MNP) Promotion dashboard in 2019 as MNP enhancements are released. Once the EAW is fully operational, there will no longer be a requirement for sailors to enter their Mark Average performance (PMA) and reward points on their exam response sheet during the exam, Prichard said. Their PMA and awards glasses will the system be calculated and transferred from their EAW to NEAS along with other promotion cycle data. The role of the individual seafarers is to ensure that data, enter comments, download the necessary supporting documents, sign and maintain awareness of the status of the sheet during the promotion cycle before the exam. Sailors can also route after exam administrative comments to their Command Education Officer (ESO). ESOs have a performance role that creates, routes and checks the appropriate sailor sheets. This role has full functionality to manually enter and modify data, download documents, enter comments, route, resolve discrepancies, close and sign sheets digitally. For more information on the pilot program, team and other user roles and responsibilities, visit NAVADMIN 316/18 and . Sailors can access NSIPS in .
