

## Equipment List

- Camera of your choice with full manual control
- Two 30-34" white-interior umbrellas or reflector (depending on lighting scenario)
- Lens Focal Length 70mm-105mm
- Hand held light meter
- Tripod (suggested)
- Camera Release (suggested)
- 2 studio strobes, speed lights or location strobes (lighting scenario 1)
- 2 continuous lights, modeling, tungsten or LED (lighting scenario 2)
- Approx 3 foot white reflector and or black card (lighting scenario 3)

### Tips

- Use a tripod to avoid motion blur and camera shake
- Lighting is left to right with your main light to camera left
- Only use the single focal point in your autofocus
- Image Stabilization - Optimal Stabilizer is off if applicable when on a tripod
