

Freelancer.com launches Enterprise Solution

SAN FRANCISCO: December 12, 2017- [Freelancer.com](https://www.freelancer.com) today announced Freelancer Enterprise, enabling large organisations to use freelancers to get more done for less.

Enabling large organisations to flexibly scale their workforce in real-time, Freelancer Enterprise is a new vendor management system for managing virtual and local workforces, giving companies access to over 26 million freelancers and independent contractors across 247 countries, regions and territories, in 34 languages and 39 currencies.

Freelancer Chief Executive Matt Barrie said, "Today, over 70% of Fortune 500 companies use [Freelancer.com](https://www.freelancer.com). With Freelancer Enterprise we are providing those large organisations with a platform that enables transparency, control, talent management and compliance, together with the ability to scale adoption across the organization".

Freelancer Enterprise has no access fees, subscriptions, monthly fees or annual fees. There are no fees to post a project or set up a user account. Employer commissions and upgrade fees are also waived for volume customers.

Freelancer Enterprise is extremely liquid - 80% of online jobs get a bid within 60 seconds in [Freelancer.com](https://www.freelancer.com), while the average location specific job gets a bid within 25 minutes. **More than 26 million freelancers with over 1,000 different skill sets can easily be pre-vetted and approved according to success criteria defined by individual enterprises. There's no other freelancing marketplace as liquid as [Freelancer.com](https://www.freelancer.com)**", Matt Barrie added.

Freelancer Enterprise features:

- **Talent meets compliance as a service**

Whether organisations want to hire freelancers directly, post a project or run a contest, Freelancer's compliance services, paired with talent sourcing, matching algorithms and managed services, will **protect them from worker classification risks and find them the perfect talent fast**. These compliance and worker classification solutions, along with a spot-checking service by US lawyers and a **rigorous KYC and identity verification service, will let companies collaborate in confidence**.

- **Workflow Automation**

Freelancer's fully featured API can **help organisations fast track workforce automation and free up the time of their staff to focus on what matters**. These can be integrated directly into companies' software, intranet or backend systems and allow them to make API calls into their virtual work cloud to hire and manage freelancers in realtime.

- **Managed Services**

With a high standard and seamless workflow from onboarding to project completion, Freelancer's Enterprise project success managers ensures companies will find top freelancers for the high quality work delivered on-time, every time. This **multi-lingual team is available 24/7 across multiple time-zones and geographies, ready to help companies find the perfect freelancer, curate their contests or assist with project management**.

- **Total Transparency**

Transparency is critical for project management in large organisations. **Freelancer's time-tracking app measures output, automates screen captures, and routes approvals for deliverables so hiring managers can provide feedback in real-time**.

- **Realtime Insights**

Measure success and track the data that matters. Companies can get real-time reporting on metrics including usage and spend, on their own customised dashboard.

- **Streamline Internal Adoption**

[Freelancer.com](https://www.freelancer.com) will provide **workshops, video tutorials and 24/7 priority support** to help organisations hit the ground running. Technical and training evangelists are ready to be onsite and prepare companies' staff for the future of work.
