

## HMH's AI Environmental Impact Statement

At HMH, we believe in creating AI solutions that are human-centered and controlled by educators. Our goal is to help teachers boost productivity, creativity and effectiveness in their workflows, allowing more time for meaningful connections with students. We also believe that innovation should never come at the expense of responsibility. Guided by our [GenAI principles](#), we prioritize teacher empowerment, student safety, and ethical use as we build new solutions.

We are closely monitoring the environmental impact of AI use to ensure our practices are responsible and transparent. Recent advancements in AI models mean the energy footprint of each prompt is continually decreasing. As we expand our AI capabilities, you can trust that HMH will prioritize responsible choices in partnerships and product usage policies. Our commitment is to deliver innovative solutions that support your goals while upholding the highest standards of sustainability and corporate responsibility.
