

Roofolan

Product : Acrylic dispersion paint available in various shades

Application : Especially designed for the coating of concrete roof tiles

Advantages : Improved outlook of the concrete roof tiles with more brilliant colour shade and shiny surface.

The coating of concrete roof tiles with **Roofolan** avoids efflorescence, because the surface is completely covered and closed.

Roofolan reduces the appearance of fungus and other settlement on the surface of the concrete roof tile.

Long lasting resistant and waterproofing.

Light and weather resistant in particular in tropical warm and humid climate.

Roofolan acrylic dispersion paint for a continuously better looking roof tile.
