IMPORTANT SAFETY INSTRUCTIONS

READ AND SAVE THESE INSTRUCTIONS BEFORE YOU START INSTALLING

Refer to Faber U&C Guides for Installation Instructions for your range hood model.

Pre-Planning Your Installation - Important: The recommended height to install this hood off the cooktop is a minimum of 24" over electric cooking surfaces and a maximum of 30" over gas surfaces for maximum effectiveness. Also consult the cooktop manufacturer's recommendation.

LINER DIMENSIONS

TOOLS NEEDED

TOOL	
Tape Measure	
Pencil	
Phillips Screwdriver	
Metal sheers	
Work gloves	

PARTS

PARTS INCLUDED

REF.	PART	QTY
A	Bottom lip of the metal liner	1
B	Front trim of the metal liner	1

REF	PART	
G	Pozi Screws (1/8" x 5/8")	  16

PREPARING FOR INSTALLING THE LINER

- 1

INSPECT THE RANGE HOOD AND THE LINER:
Fully inspect the range hood and the liner for damage before installation.

If there is damage please document and contact your retailer.

IF DAMAGED BY THE CUSTOMER, REPAIR OR REPLACEMENT IS THE RESPONSIBILITY OF THE CUSTOMER.

IF THE UNIT IS DAMAGED BY INSTALLATION (OTHER THAN THE CUSTOMER) REPAIR OR REPLACEMENT IS ARRANGED BETWEEN THE CUSTOMER AND THE INSTALLER.

- 2.a

REMOVE THE FLOOR OF THE CABINET:
Remove the floor of the cabinet.

WARNING

Make sure the surface you are securing your range hood to is capable of holding the weight of the range hood. Review your hood’s specification to find the exact weight of the range hood.

At a minimum your surface should be able to support 40lbs. Failure to do so may cause personal injury or damage to the cooking surface or counter. Wood blocking may need to be added to the cabinet base.

PREPARING THE CABINET FLOOR

2.b CUT OUT THE CABINET FLOOR:
In some applications, a cut-out may be needed on the cabinet floor. Use figure below to determine the cut-out dimensions for your specific hood application.

For less than 3/4" side walls additional trim may need to be added.

Liner Model	Wood Hood Exterior Width	LINER		Interior cabinet / Cut out Width (x)	Interior cabinet depth / Cut out (y)	
		Width	Depth		Without back panel	With back panel *
LINSPT30I228	30 inches	28 3/8"	17 1/2" - 20 1/2"	28 1/2"	17 1/2" - 20 1/2"	17 1/8" - 20 1/8"
LINSPT36I228	36 inches	34 3/8"	17 1/2" - 20 1/2"	34 1/2"		

* Assumes back panel cabinet thickness of 3/8 "

INSTALLING THE LINER

3

ALIGN THE LINER WITH THE CABINET FLOOR:

Align the bottom lip of the rear liner **A** with the bottom lip of the cabinet.

4

ATTACHING THE LINER:

Attach the back of the liner with 9 screws. 3 screws along the back, 3 on each side.

Do not attach the screws on each side near the front trim.

These need to remain available to adjust the front part of the liner.

ATTACHING THE FRONT TRIM

- 5** Align the front trim to the installed portion of the liner. Use the guide hole to locate the correct depth for the application.

- 6** Attach the front trim with 2 screws on each side of the trim.

- 7** Attach the front trim with 3 screws.

INSTALLING THE RANGE HOOD

- 8** Follow the Installation Instructions for your range hood to install the range hood to the liner.

NOTE: Inca Lux and Inca In-Light models will not need additional safety screws to secure the hood to the liner. For all inca model refer to the hood installation manuals to finalize installation.
