

PACKAGED SOLUTIONS

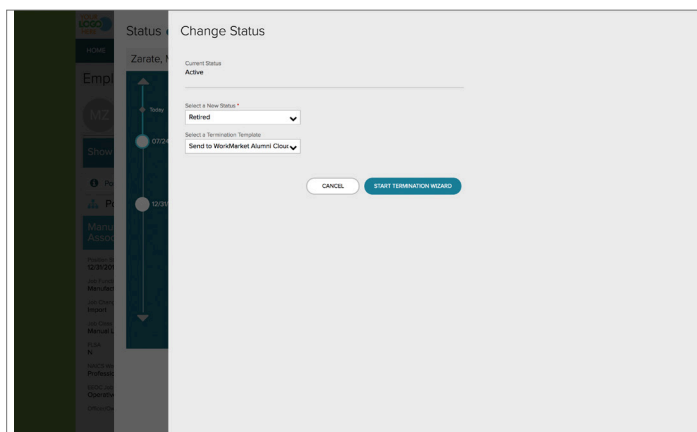

Avoid the Corporate Brain Drain, with Alumni Labor Clouds

Retain valuable institutional knowledge with Alumni Labor Clouds, and amplify your freelancer network from there.

Freelance engagement often starts with your alumni, full time employees who are retiring and taking valuable institutional knowledge with them. Wouldn't be great to keep in touch with your alumni and engage them on projects when you need them? Now you can organize, manage and pay your entire freelance workforce with WorkMarket.

Once you learn how to manage your alumni network, you can then invite other freelancers to join your bench of vetted, on-demand labor clouds. When your labor clouds are ready, send Assignments to qualified freelancers, when and where you need them.

As your work gets completed, Assignments automatically convert into unique invoices with all of the required information you need to pay your freelancers and update Workforce Now.

What does WorkMarket's Freelance Management System bring to your ADP HCM?
