

INTEGRATION

SAP Fieldglass

PACKAGED SOLUTIONS

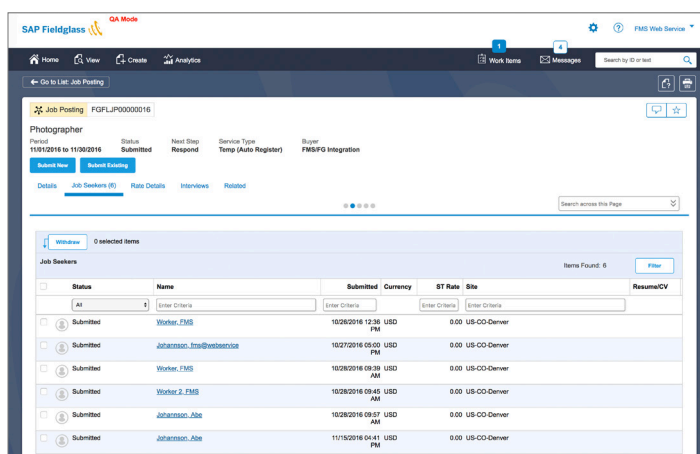

Direct From the Source: Labor Clouds Expand Your Talent Bench

Add a freelancer labor cloud to your list of options for sending requisitions, and engage directly with the talent you need.

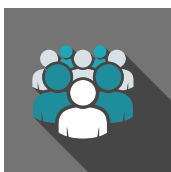

WorkMarket's integration with Fieldglass follows the labor workflow you already know: submit a requisition, get responses, and select your candidate.

WorkMarket offers even more with labor clouds. Engage directly with freelancers and respond immediately, expanding your bench of talent.

Get the best of both worlds, and eliminate friction with direct end-worker engagement. Tap into a direct source of freelancer talent, and always retain the option to look to your partners if no one is available on your labor cloud.

What does WorkMarket's Fieldglass Integration offer you?

EXPAND YOUR SOURCE OF TALENT

- Route tasks to your curated Freelancer Labor Clouds
- Smart routing rules engage the right talent at the right time

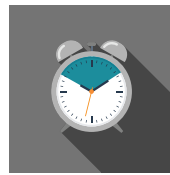

LEVERAGE YOUR FIELDGLASS CONFIGURATION

- You have set up rules, budgets, reports, etc.– they all remain the same
- Simply add an additional talent stream that you didn't have access to before via Labor Clouds

TWO-WAY INTEGRATION

- Requisitions go out and job seekers come back with applications
- Updates are sent between systems as ongoing work is tracked

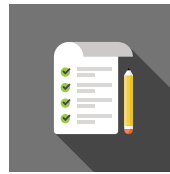

TIME TRACKING

- The WorkMarket mobile app supports time tracking
- Additional geo-location fencing is available for reporting in real time

TIME SAVINGS

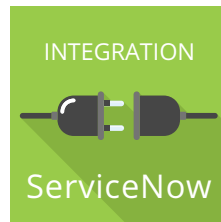

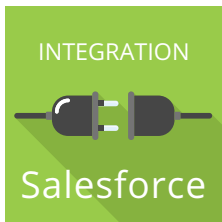

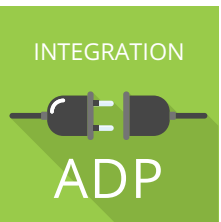

- Your managers do not need to pivot from system to system
- All of the integrations are automated

COMPLIANCE

- WorkMarket monitors activity to make sure you are engaging with your freelancers compliantly
- Smart rules prevent you and the worker from falling out of compliance
