

These pages make up your push funnel and they are the same ones that we use.

Again, these pages and giveaways are to attract people to click "YES" on your page, so they are added to your push list where you can market Warrior Plus offers to them as shown in the main course.

Inside this package you'll find, 11 power push pages, 11 push images, download page, download link and 11 push ads and 11 push ads that go out immediately when your prospect clicks YES.

So, choose one of the 11 that suits you best, start with one and when that gets lots of use, mix it up and deploy one of the others.

Inside each folder you'll find an image to upload as a logo to push engage plus 2 ads. Each ad has two versions, when you add the

smart code to your push page, this is what will show at the top of your page. The second version you will need to set up as your welcome drip message on Push Engage that goes out immediately when they click YES so people can get your free giveaway (download link included)

These pages are all you need to build your push list fast! We have given you 11 for variety but of course you only need to use one at a time. And by the way there is so much traffic out there, you never have to worry about over saturation.

**It's really easy to set everything up, [I have made a full video here that shows how to do it.](#)**

Again, if you need to see a live example of how this all works you can [click here.](#)

Can't wait to hear your success stories!

Paul Prissick and Mark Barrett

P.S – [Make sure to download our top 30 power ads of all time](#), if you want to hit the ground running and make money the fastest. Also, if you need help connecting the dots you can attend our live coaching call, [you can get full information here](#).
