

So, in the funnel package, all that is designed to get people on your push list and incentivize them with a free giveaway. By the way in case you did not have a chance to download it, [you can grab it here](#).

**Now that you have people on your push list the fun begins – making money.** This is a really easy process as all you need to do is to “send a push broadcast to all your subscribers using one of the top ads”.

With push ads, we tend to be a bit more aggressive than we are with email marketing. It’s important to catch people’s attention and get them to click. Then let the sales page of the product you are promoting do the selling for you. We don’t get product descriptive in the ad itself, *it’s only job is to get the click*.

To get started simply open the screen to send a push broadcast and enter one of the ads. Then get your Warrior Plus affiliate link for the product you are promoting and enter it in the URL section (there is a video in the main course on how to get your affiliate link and choose offers)

**Press send, and you are done for the day!**

We have tested hundreds and hundreds of ads and these ones have **historically done the best by far**. The ads are generic enough to use with any make money offer.

You can be confident that you are maximizing your revenue for each push that you send.

You'll find all the top in ads in a text file in this folder.

Happy earning,

Paul Prissick and Mark Barrett
