## **SUPPLEMENTARY INFORMATION**

### **I. Abstract**

The Quarterly Services Survey (QSS) covers employer firms with establishments located in the United States and classified in select service industries as defined by the North American Industry Classification System (NAICS). The QSS coverage currently includes all or parts of the following NAICS sectors: utilities (excluding government owned); transportation and warehousing (except rail transportation and postal) services; information; finance and insurance (except funds, trusts, and other financial vehicles); real estate and rental and leasing; professional, scientific, and technical services; administrative and support and waste management and remediation services; educational services (except elementary and secondary schools, junior colleges, and colleges, universities, and professional schools); health care and social assistance; arts, entertainment, and recreation; and other services (except public administration). The primary estimates produced from the QSS are quarterly estimates of total operating revenue and the percentage of revenue by source. The survey also produces estimates of total operating expenses from tax-exempt firms in industries that have a large not-for-profit component. In addition, for hospitals, the survey produces estimates of the number of inpatient days and discharges and for select industries in arts, entertainment, and recreation sector, the survey produces estimates of admissions revenue. Beginning in March 2013, with the introduction of a new QSS sample, the QSS will also provide estimates of revenue for the

accommodation subsector and estimates for interest income, loan fees, fees and commissions, financial planning and investment management, and net gains and losses from brokering for select finance and insurance industries.

Firms are selected for this survey using a stratified design with strata defined by industry, tax status, and estimated size based on annual revenue. The sample consists of approximately 18,000 firms and consists of a subsample of firms from the larger Service Annual Survey. Each quarter the QSS sample is updated to reflect the addition of new businesses and the removal of firms that have gone out-of-business.

The Bureau of Economic Analysis uses the survey results as input to its quarterly Gross Domestic Product (GDP) and GDP by industry estimates. The estimates provide the Federal Reserve Board and Council of Economic advisors with timely information to assess current economic performance. The Centers for Medicare and Medicaid Services use the QSS estimates to develop hospital-spending estimates for the National Accounts. Other government and private stakeholders also benefit from a better understanding of important cyclical components of our economy.
