SUPPLEMENTARY INFORMATION:

Title: FERC-546, Certificated Filings: Gas Pipeline Rates.

OMB Control No.: 1902-0155

Type of Request: Three-year extension of the FERC-546 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission reviews the FERC-546 materials to decide whether to determine an initial rate associated with an application for a certificate under NGA Section 7(c). It reviews FERC-546 materials in 4(f) storage applications to evaluate market power and decide whether to grant, deny, or condition market based rate authority for the applicant. The Commission uses the FERC-546 information to monitor jurisdictional transportation, natural gas storage, and unbundled sales activities of interstate natural gas pipelines and Hinshaw¹ pipelines. In addition to fulfilling the

¹ Hinshaw pipelines are those that receive all out-of-state gas from entities within or at the boundary of a state if all the natural gas so received is ultimately consumed within the state in which it is received, 15 U.S.C. § 717(c). Congress concluded that Hinshaw pipelines are "matters primarily of local concern," and so are more appropriately regulated by pertinent state agencies rather than by FERC. The Natural Gas

Commission's obligations under the NGA, the FERC-546 enables the Commission to monitor the activities and evaluate transactions of the natural gas industry, ensure competitiveness, and improved efficiency of the industry's operations. In summary, the Commission uses the FERC-546 information to:

- ensure adequate customer protections under section 4(f) of the NGA;
- review rate and tariff changes by natural gas companies for the transportation of gas, natural gas storage services;
- provide general industry oversight;
- and supplement documentation during its audits process.

Failure to collect this information would prevent the Commission from being able to monitor and evaluate transactions and operations of interstate pipelines and perform its regulatory functions.

Type of Respondents: Pipeline companies and storage operators.

Estimate of Annual Burden²: The Commission estimates the total Public Reporting Burden for this information collection as:

Act section 1(c) exempts Hinshaw pipelines from FERC jurisdiction. A Hinshaw pipeline, however, may apply for a FERC certificate to transport gas outside of state lines.

² Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.
