Federal Energy Regulatory Commission

Appalachian Gateway Project

Docket No. CP10-448-000

### Notice of Availability of Draft General Conformity Analysis

In accordance with the National Environmental Policy Act of 1969, the Clean Air Act and the Federal Energy Regulatory Commission's (Commission or FERC's) regulations, Commission staff has prepared this draft General Conformity Determination (GCD) for the Appalachian Gateway Project (Project) to assess the potential air quality impacts associated with the construction and operation of natural gas pipelines, compressor stations, and aboveground facilities currently being constructed by Dominion Transmission, Inc (Dominion) under Docket Number CP10-448-000 in Pennsylvania.

The FERC staff concludes that the Project will achieve conformity in Pennsylvania with the use of Pennsylvania Department of Environmental Protection emission credits. If significant new comments are received by the end of the 30-day public comment period, which ends **on September 2, 2012**, FERC staff will issue a final GCD to address any changes necessary and respond to comments. If no new significant comments are received, FERC staff will issue a public notice identifying this GCD as final.

The revised draft GCD addresses the potential air quality impacts on Pennsylvania air quality from the construction and operation of the Project. The Project consists of the following natural gas pipeline facilities in West Virginia and Pennsylvania: construction of 109.1 miles of 20-inch, 24-inch, and 30-inch-diameter interstate natural gas transmission pipeline, four new compressor stations, and modifications to two existing compressor stations.

Any person wishing to comment on the draft GCD may do so. To ensure that your comments are properly recorded and considered prior to issuance of the final GCD, it is important that we receive your comments in Washington, DC on or before **September 2, 2012**.
