SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The purpose of the Lead in Construction Standard and its information collection

requirements is to reduce occupational lead exposure in the construction industry. Lead exposure can result in both acute and chronic effects and can be fatal in severe cases of lead toxicity. Some of the health effects associated with lead exposure include brain disorders which can lead to seizures, coma, and death; anemia; neurological problems; high blood pressure; kidney problems; reproductive problems; and decreased red blood cell production. The Standard requires that employers: establish and maintain a training program; review the compliance program annually; provide exposure monitoring and medical surveillance programs; and maintain exposure monitoring and medical surveillance records. The records are used by employees, physicians, employers and OSHA to determine the effectiveness of the employer's compliance efforts. The Standard seeks to reduce disease by requiring exposure monitoring to determine if lead exposures are too high, by requiring medical surveillance to determine if employee blood lead levels are too high, and by requiring treatment to reduce blood lead levels.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and

- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting an adjustment increase in burden hours from 1,363,802 to 1,425,907 (a total increase of 62,105 hours). The adjustment is primarily due to estimated increases in the number of firms, based on updated data and estimates.

Type of Review:	Extension of a currently approved collection.
Title:	Lead in Construction Standard (29 CFR 1926.62).
OMB Number:	1218-0189.

Estimated Total Burden Hours:	1,425,907.

**Estimated Cost
(Operation and
Maintenance):** \$60,093,015.

IV. Public Participation — Submission of Comments on this Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA-2012-0014). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled “ADDRESSES”). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350, (TTY (877) 889-5627).

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not

publicly available to read or download through this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available through the Web site and for assistance in using the Internet to locate docket submissions.
