AUTHORITY: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: Under Regulations 30 CFR parts 7 and 15, the MSHA evaluates and approves explosive materials and blasting units as permissible for use in the mining industry; however, since there are no permissible explosives or blasting units available that have adequate blasting capacity for some metal and nonmetal gassy mines, 30 CFR 57.22606(a) outlines the procedures for a mine operator to follow when using non-approved explosive materials and blasting units. The standard requires the mine operator of a Class III metal or nonmetal mine (gassy mine) to notify the MSHA in writing prior to the use of any non-approved explosive materials and blasting units. The MSHA then evaluates the non-approved explosive materials and determines whether they are safe for use in a potentially gassy environment.
