**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This request is for extension of a current information collection.

Participants in most Federally-managed fisheries in the Southeast Region are currently required to keep and submit catch and effort logbooks from their fishing trips. A subset of these vessels also provide information on the species and quantities of fish, shellfish, marine turtles, and marine mammals that are caught and discarded or have interacted with the vessel's fishing gear. A subset of these vessels also provide information about dockside prices, trip operating costs, and annual fixed costs.

The data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations. Interaction reports are needed for fishery management planning and to help protect endangered species and marine mammals. Price and cost data will be used in analyses of the economic effects of proposed regulations.

**II. Method of Collection**

The information is submitted on paper forms. Logbooks are completed daily and submitted on either a by trip or monthly basis, depending on the fishery. Fixed costs are submitted on an annual basis. Other information is submitted on a trip basis.
