NUCLEAR REGULATORY COMMISSION

[NRC-2013-0041]

Proposed Revision to Design of Structures, Components, Equipment and Systems

AGENCY: Nuclear Regulatory Commission.

ACTION: Standard review plan-draft section revision; extension of comment period.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is extending the comment period of a notice that was published in the *Federal Register* (FR) on March 1, 2013 (78 FR 13911), that announced the request for comments on the proposed revisions in Chapter 3, "Design of Structures, Components, Equipment, and Systems;" and the request for comment on NUREG-0800, "Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants: LWR Edition." The public comment period was scheduled to expire on April 1, 2013; however, several stakeholders requested additional time for review to provide more meaningful comments on the draft staff guidance. In order to allow the public sufficient time to review and comment on the draft staff guidance, the NRC has decided to extend the comment period for the draft guidance document until May 1, 2013.

DATES: The comment period has been extended and expires on May 1, 2013. Comments received after this date will be considered if it is practical to do so. The NRC is only able to assure consideration of comments received on or before this date.
