BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY
FEDERAL ENERGY REGULATORY COMMISSION

Archon Energy 1, Inc.

Project No. 14484-000

Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments,
Motions to Intervene, and Competing Applications

On January 25, 2013, the Archon Energy 1, Inc., filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Kaweah River Drop 1 Hydroelectric Project (Kaweah River Drop 1 or project) to be located on Kaweah River, near the city of Woodlake, Tulare County, California. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project has two installation option alternatives; an in-stream method and a short diversion method. The in-stream option would consist of the following: (1) a gated water intake canal; (2) a 70-foot by 55-foot by 35-foot turbine structure enclosing two in-stream VLH turbine generators operating at 500 kilowatts kW; and (3) appurtenant facilities. The short diversion method would consist of the following: (1) a gated water intake canal; (2) a concrete trough diversion channel approximately 30 feet wide and 150 feet in length; (3) a 70-foot by 55-foot by 35-foot turbine structure enclosing four screw turbine generators operating at 250 kW; and (4) appurtenant facilities. The proposed project would have a total installed capacity of 1 megawatt and generate an estimated average annual energy production of 5,000 megawatt-hours by diverting existing stream flow into the diversion canal.
