SUPPLEMENTARY INFORMATION: This information collection supports safe use of high-voltage continuous mining machines (HVCMM) in underground coal mines by requiring records of testing, examination and maintenance on machines to reduce fire, electrical shock, ignition, and operational hazards. Coal mine supervisors and employees, State mine inspectors, and Federal mine inspectors use the records to document whether mine operators have conducted examinations and tests and have given insight into hazardous conditions encountered or that may be encountered. The records of inspections greatly assist those who use them in making decisions that will ultimately affect the safety of miners working with HVCMM. For additional substantive information about this ICR, see the related notice published in the Federal Register on April 8, 2013 (78 FR 20949).

This information collection is subject to the PRA, because the information collection is included in a rule of general applicability, 30 CFR part 75. See 5 CFR 1320.3(c)(4)(i). A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently

valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219-0140.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on August 31, 2013. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. It should also be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the ADDRESSES section within 30 days of publication of this notice in the Federal Register. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219-0140. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected;
- and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
