The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class E surface area airspace and Class E airspace extending upward from 700 feet above the surface at Sitka Rocky Gutierrez, AK. After review of the

airspace, the FAAs Western Terminal Products Office found modification of the airspace necessary for the safety and management of aircraft departing and arriving under IFR operations at the airport. The segment of Class E surface area airspace southwest of the 4.1-mile radius of the airport would be modified to 10 miles southwest of the airport. The segment of Class E airspace extending upward from 700 feet above the surface southwest of the 6.6-mile radius of the airport would be modified to 14 miles southwest of the airport, and the segment northwest of the 6.6-mile radius of the airport would be modified to 29 miles northwest of the airport. The segments of controlled airspace west and southwest of the airport would be removed as they are no longer required for aircraft arriving and departing under IFR operations. This would enhance the safety and management of aircraft operations at the airport.

Class E airspace designations are published in paragraphs 6002 and 6005, respectively, of FAA Order 7400.9X, dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR Part 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic

impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This proposed regulation is within the scope of that authority as it would modify controlled airspace at Sitka Rocky Gutierrez Airport, Sitka, AK.

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
