Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart O. Owners or operators of the affected facilities must make an initial notification report, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Sewage sludge treatment plant incinerators.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart O).

Estimated number of respondents: 112 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 12,464 hours (per year). “Burden” is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,179,185 (per year), includes \$3,960,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in labor hours in this ICR compared to the most recently approved ICR. This is due to two considerations: 1) the regulations have not changed over the past three years, and are not anticipated to change over the next three years; and 2) the growth rate for the industry is very low, so there is no significant change in the overall burden. However, there is a slight increase in the respondent labor costs due to the use of updated labor rates.
